Please do not approve this proposed marijuana farm. It will impact our residential community only in harmful ways. Our quality of life will be affected with the strong odors and the wild life in the pond directly below the proposed grow site would also be affected. In addition, our property values will suffer greatly. Something that is allowed into a community that then needs to be disclosed to potential buyers is not a good addition. Please, please, please do not approve this proposal. I have included some photos of the frequent avian visitors to the aforementioned pond. Thank you.

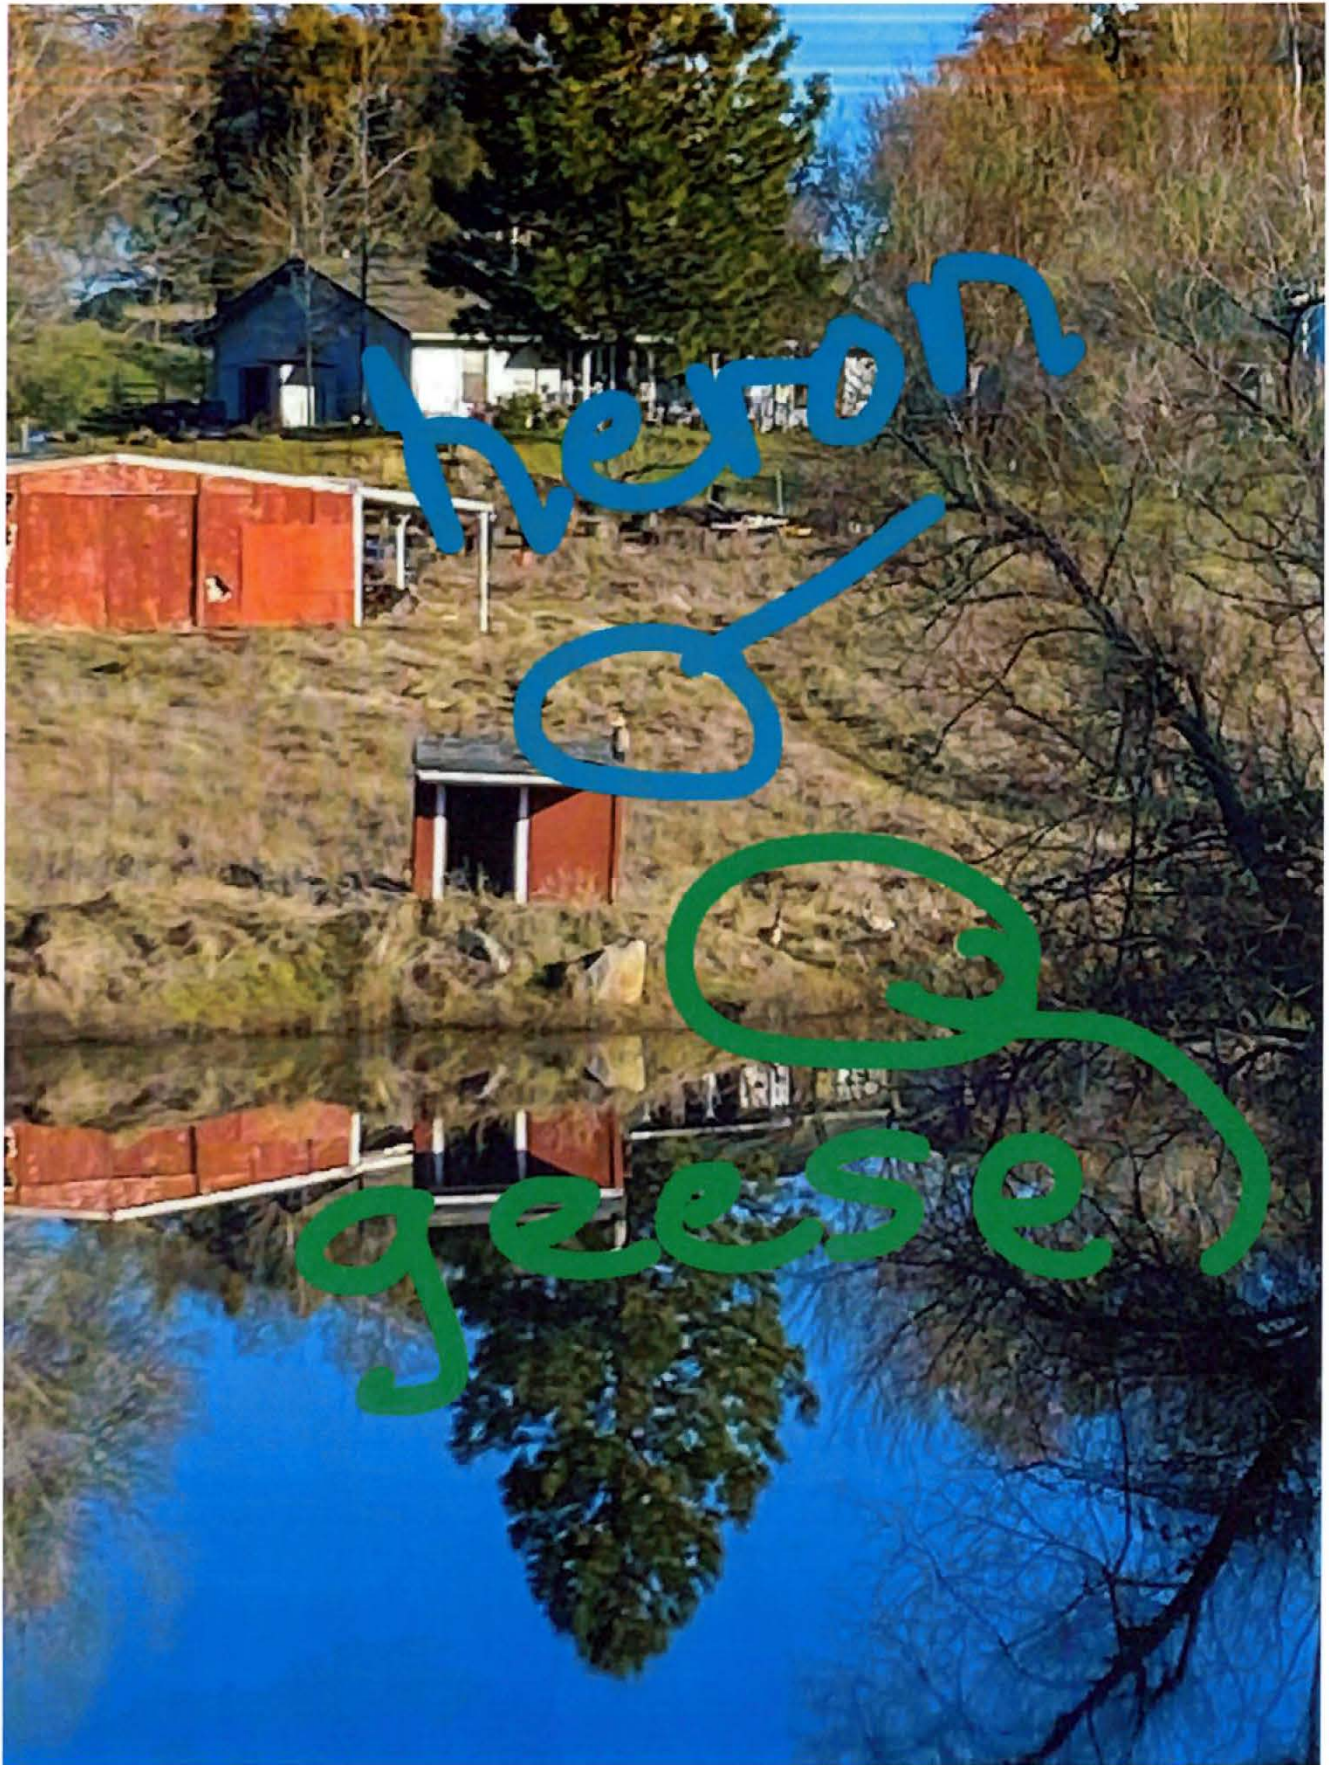

Warm regards,

Julie
