Dear Supervisors:

I am writing this letter to request that you take a hard look at the independent traffic safety analysis that was performed related to this project. This analysis showed several hazardous conditions for bicyclists and pedestrians.

Just as you would be willing to pay out of pocket to get a 2nd opinion regarding a major surgery, the residents of this community, out of concern for their safety, have paid for this analysis. The board of supervisors owes it to these residents to carefully consider this second report and request that the city traffic engineers identify and explain the differences between the two reports. Even if it does not change the overall conclusions and opinion, it gives everyone the confidence and ease of mind that the city is working in the best interest of its people.

In the event of an injury in the future that can be related to the changes that are being proposed at this intersection, the completion of the above analysis will be very helpful in defending the decisions that are about to be made.

The buy-in of the residents of this community is necessary to ensure the success of this business. When there are three other gas stations less than 1/2 mile away, it will not be a hard choice for them to take their business elsewhere.

Thank you for your consideration.
Masoud Ghalambor, MD

Please put public safety first and approve the ARCO AMPM appeal. Send this project back to planning to address the outstanding public safety issues.

Jenny Diel
