

EL DORADO SOLID WASTE ADVISORY COMMITTEE

January 7, 2025

Jeffrey Warren, REHS
Director of Environmental Management
Environmental Management Department
County of El Dorado
2850 Fairlane Ct. Building C
Placerville, CA 95667

Dear Director Warren:

The El Dorado County Solid Waste Advisory Committee (EDSWAC) was established in 1990 under AB 939, of the California Integrated Waste Management Act (CIWMP).

Responsibilities of EDSWAC include: to identify solid, liquid, and hazardous waste issues that are a countywide or regional concern; assist with the coordination and continued development of source reduction and recycling programs; determine the need for solid waste collection systems, processing facilities, and marketing strategies that can serve more than one local jurisdiction within this region; and prepare, maintain, and update the El Dorado County Solid Waste Management Plan (SWMP).

EDSWAC was instrumental in getting the California Integrated Waste Management Board. To approve the El Dorado County:

- Sitting Element
- Reduction and Recycling Element
- Household Hazardous Waste Element
- Non-Disposal Facility Element,
- Summary Plan

The California Department of Resources Recycling and Recovery requires jurisdictions to review their Summary Plan every 5 years. **El Dorado County's Five-Year CIWMP review is due on November 30, 2025.**

EL DORADO SOLID WASTE ADVISORY COMMITTEE

Action Item

On January 13, 2025, at the first EDSWAC meeting of 2025, the El Dorado County Environmental Management Department Staff (EMD) provided EDSWAC with the Five-Year Countywide Integrated Waste Management Plan (CIWMP) Report under agenda item 25-0111.

This included:

- Draft approval letter from EDSWAC to EMD
- CalRecycle Form 709 for 2020
- Draft CalRecycle Form 709 for 2025 (25-0111 C)
- Draft BOS Item (25-0111 D)
- Notification email (25-0111 E)

EDSWAC was asked to review the item under agenda item 25-0111, and make a motion to approve, deny, or modify the items for submittal and chair signature.

Review Process

We have reviewed the following planning documents in the Electronic Annual Report for the City of Placerville, City of South Lake Tahoe, and the El Dorado County- Unincorporated:

1. Countywide Integrated Waste Management Summary Plan
2. Household Hazardous Waste Element
3. Non-disposal Facility Element
4. Siting Element
5. Source Reduction and Recycling Element
6. 2020-2024 Electronic Annual Reports

Conclusion

We believe that it is reasonable to say that all the programs are working as each jurisdiction is maintaining disposal rates comparable with state averages. We further believe that there is no need to revise any of the planning documents listed above and support the information provided in the Five-Year CIWMP Report prepared by County staff.

Upon review of the aforementioned documents and reports, EDSWAC finds that all jurisdictions are working in good faith to implement programs identified in the Summary Plan and subsequent annual updates. The County of El Dorado has met all regulatory requirements provided in the Five-Year CWIMP Report prepared by County staff.

EL DORADO SOLID WASTE ADVISORY COMMITTEE

Therefore, EDSWAC concludes that the current CIWMP is adequate for meeting the State of California's mandated 50% diversion requirement under AB939 and does not require revision.

Recommendations for the State

As you are aware, in January 2012 the County Board of Supervisors adopted a "Solid Waste Management Plan" (SWMP). The SWMP provides the County with a strategic roadmap through the year 2040 to use in planning for: coordinated, countywide, and jurisdiction cooperation; initiating new or enhancing existing solid waste programs and services; developing new and enhanced solid waste facility infrastructure; and maintaining solid waste flow control. The SWMP was designed to assist the County in reaching its 75% landfill diversion goal by 2020 in the most cost-effective manner. With all due respect and consideration of the State's CIWMP requirement, EDSWAC believes that the County's SWMP will help move the County forward more effectively to meet both the County and State's 75% diversion goal than the five-year CIWMP review process and annual updates.

The State's current regulatory model includes the annual update of twenty-year-old solid waste planning documents through the annual report process, as well as the five-year CIWMP review process.

It is the opinion of EDSWAC that this approach is cumbersome, inefficient, and not very effective. EDSWAC respectfully recommends that CalRecycle update applicable sections of the Public Resource Code and California Code of Regulations to require jurisdictions to develop current, comprehensive, and integrated solid waste planning documents.

EL DORADO SOLID WASTE ADVISORY COMMITTEE

Result

A motion was made on agenda item 25-0111 stating “_” and passed.

On behalf of the El Dorado Solid Waste Advisory Committee (EDSWAC), I would like to notify you that we have completed the review of the Five-Year Countywide Integrated Waste Management Plan (CIWMP) Report.

Sincerely,

Date: _____

Catherine Dickson Schwarzbach, Ed.D.
Chair
El Dorado County Solid Waste Advisory Committee (EDSWAC)
