The table below is a preliminary assessment of the 2010 Census data. It shows redistricting is going to be necessary and possibly rather complex. There are two very surprising numbers: District 2 grew by 46%; and District 5, the Tahoe Basin area shrank by 10%.

Supervisory District	Census 2010 Population	Redistrict Target Population (Mean)	Current Pct Of Target	Population Change to Target	Census 2000 District Population	Percent Change
1	38165	36212	5	-1953	30541	25%
2	44471	36212	23	-8259	30559	46%
3	32066	36212	-11	4146	30587	5%
4	35610	36212	-2	602	30570	16%

1.08.010 Designated.

A. Following each decennial federal census, and using population figures as validated by the population research unit of the department of finance as a basis, the board shall adjust the boundaries of any or all of the supervisorial districts of the county so that the districts shall be as nearly equal in population as may be. At any time between the decennial adjustments, the board may make adjustments of district boundaries pursuant to Elections Code section 35003. In establishing the boundaries of the districts, the board may give consideration to the following factors:

1. Topography;
2. Geography;
3. Cohesiveness, contiguity, integrity and compactness of territory; and
4. Community of interests of the districts.

B. The board of supervisors shall establish and adjust the boundaries by ordinance. The changes shall be reflected in a map of supervisorial districts which shall be available for public inspection at the planning department. (Ord. 3685 §1, 1986: Ord. 3172 §10(part), 1981: prior code §2101)

The boundaries of the supervisorial districts of the county are hereby amended to correspond to the map endorsed by the County Surveyor and the Clerk of the Board of Supervisors on file with the Clerk of the Board of Supervisors entitled "Official Map, Supervisorial District Boundaries, Adopted August 2001."
