Re: Extension of Iteris' contract for the El Dorado County Intelligent Transportation Systems (ITS) Master Plan

Dear Mrs. Somavarapu,

This letter is in response to the memo transmittal from Iteris dated April 16, 2007 requesting an extension of the ITS Master Plan contract from June 30, 2007 to August 15, 2007. As this Master Plan utilizes funding programmed by the El Dorado County Transportation Commission (EDCTC), it is our understanding that the Commission's approval of this extension request is required prior to its submittal to the El Dorado County Board of Supervisors. EDCTC approves the extension request with the following condition:

- A significant portion of the funds (\$60,000) programmed by the EDCTC for the ITS Master Plan are Rural Planning Assistance funds which expire at the end of the fiscal year (June 30, 2007). In reference to page 2 of the Iteris extension request memo, any unencumbered RPA funds programmed to this project at fiscal year's end will expire, and the El Dorado County Department of Transportation will need to utilize an alternate fund source to cover any potential budget shortfalls as a result of this occurrence.

Note: The balance of funds (\$40,000 maximum) programmed to this project are Local Transportation Funds, which do not have an expiration date and will be available to the project after fiscal year's end.

Please contact me at (530) 642-5262 with any questions regarding this matter.

Regards,

Michael Higgins
Senior Transportation Planner
