Hi Michael,

We live in the proposed Weber Creek Canyon IBC district and I have some questions regarding this issue.

What do you consider to be a discretionary project?

What do you consider to be a ministerial project?

What will entail a biological resource technical report and who would you get to do a report if needed?

What do you mean by properties within the IBC overlay that are found to support wildlife movement shall provide mitigation to ensure there is no net loss of wildlife movement?

While we want to protect the wildlife that is here in our County, we do not appreciate the County dictating what we can or cannot do on our property that we own. We are not sure where all of this coming from or why and if it includes all properties that are along Weber Creek or just the properties that you identified in your letter to us.

Thank you for your time.

Annette & Wayne Hawley
