

Hilde Schweitzer  
Riverfront property owner on the South Fork American River

Comments on Monday Oct 8, 2018 RMAC agenda item:

8-1394: Committee Member Smay requests the Committee review the Committee recommended RMAC resolution for possible changes and additions.

I have one comment regarding the landowner/resident representative definition on the RMAC.

- **Landowner/Resident Representative.** There shall be a landowner/resident representative who shall be an owner of residential property or a resident on property that is within the project area defined in the River Management Plan. This representative shall not have a financial interest in any outfitting business nor derive their primary income from any aspect of commercial outfitting.

As a riverfront landowner I do not feel that I will potentially be adequately represented with this proposed definition of Landowner/Resident Representative.

Riverfront landowners represent a unique and highly impacted group that deserves a representative that owns and resides on riverfront property along the South Fork American period. I do not feel that someone who merely “resides” as a potential renter, or who may or may not live close to the river itself (“property that is within the project area”) can adequately understand or adequately represent my interests as a riverfront property owner.

Please consider changing the definition of Landowner/Resident Representative to read:

**There shall be a landowner/resident representative who shall be an owner of riverfront residential property within the project area defined in the River Management Plan. This representative shall not have a financial interest in any outfitting business nor derive their primary income from any aspect of commercial outfitting.**

Thank you for your attention to my comments,

Hilde Schweitzer
