

# EL DORADO DISPOSAL

## Updates on New MRF Project

Trash • Recycle • Yard Waste

*El Dorado Disposal*  
Safety in all we do • Service 2nd to none.

ARCH | NEXUS

16-1011 B 1 of 15

# BACKGROUND

Franchise agreement adopted in 2014

Waste Connections commitment to rebuild the  
Material Recovery Facility (MRF)

Alignment with the Solid Waste Management Plan

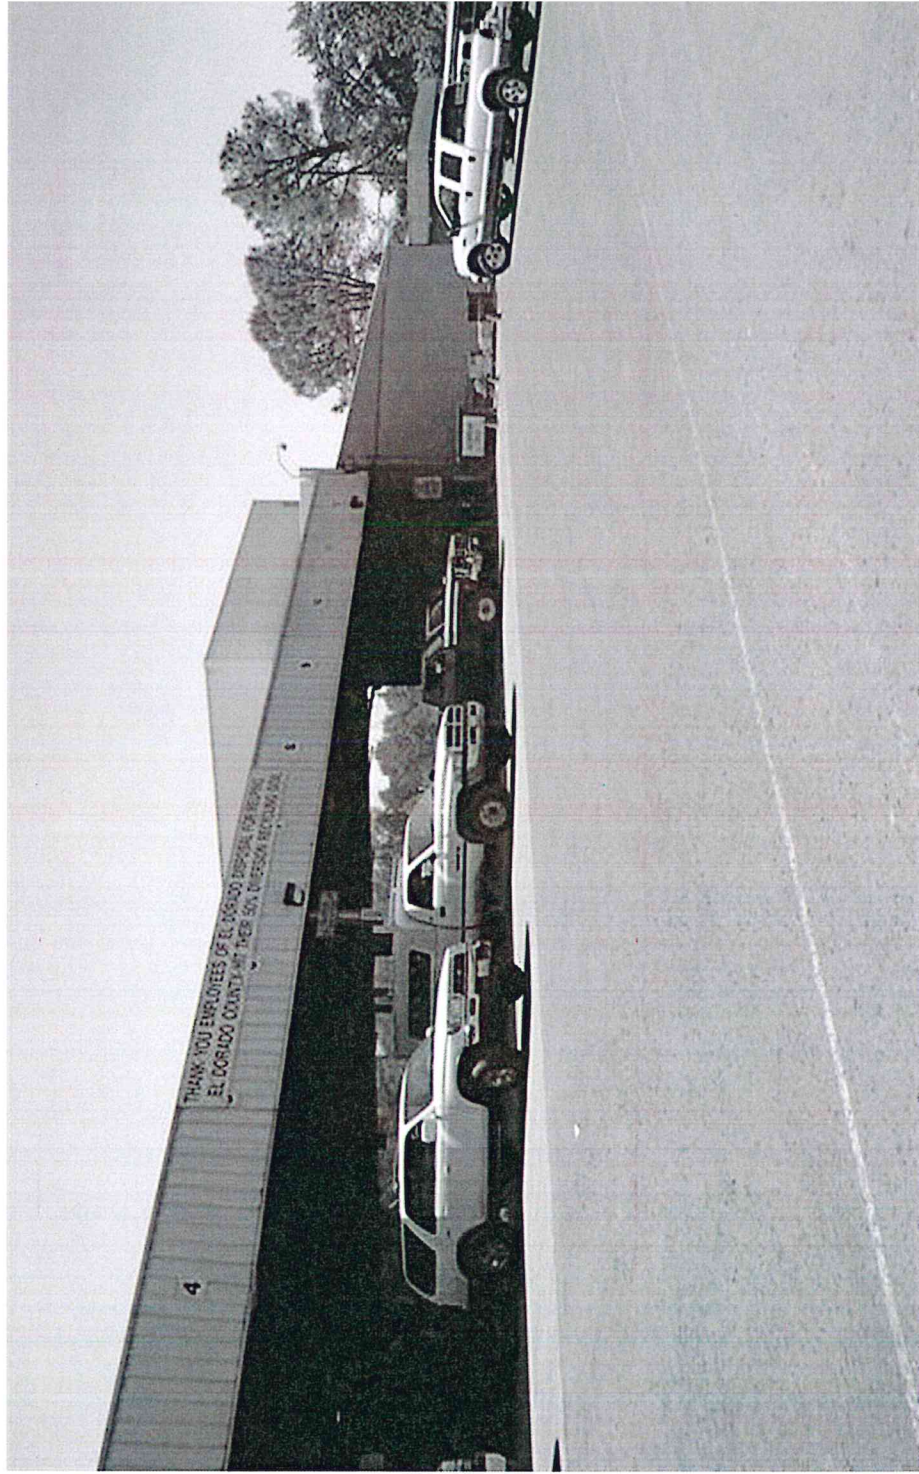

# LARGE WEEKEND TRAFFIC

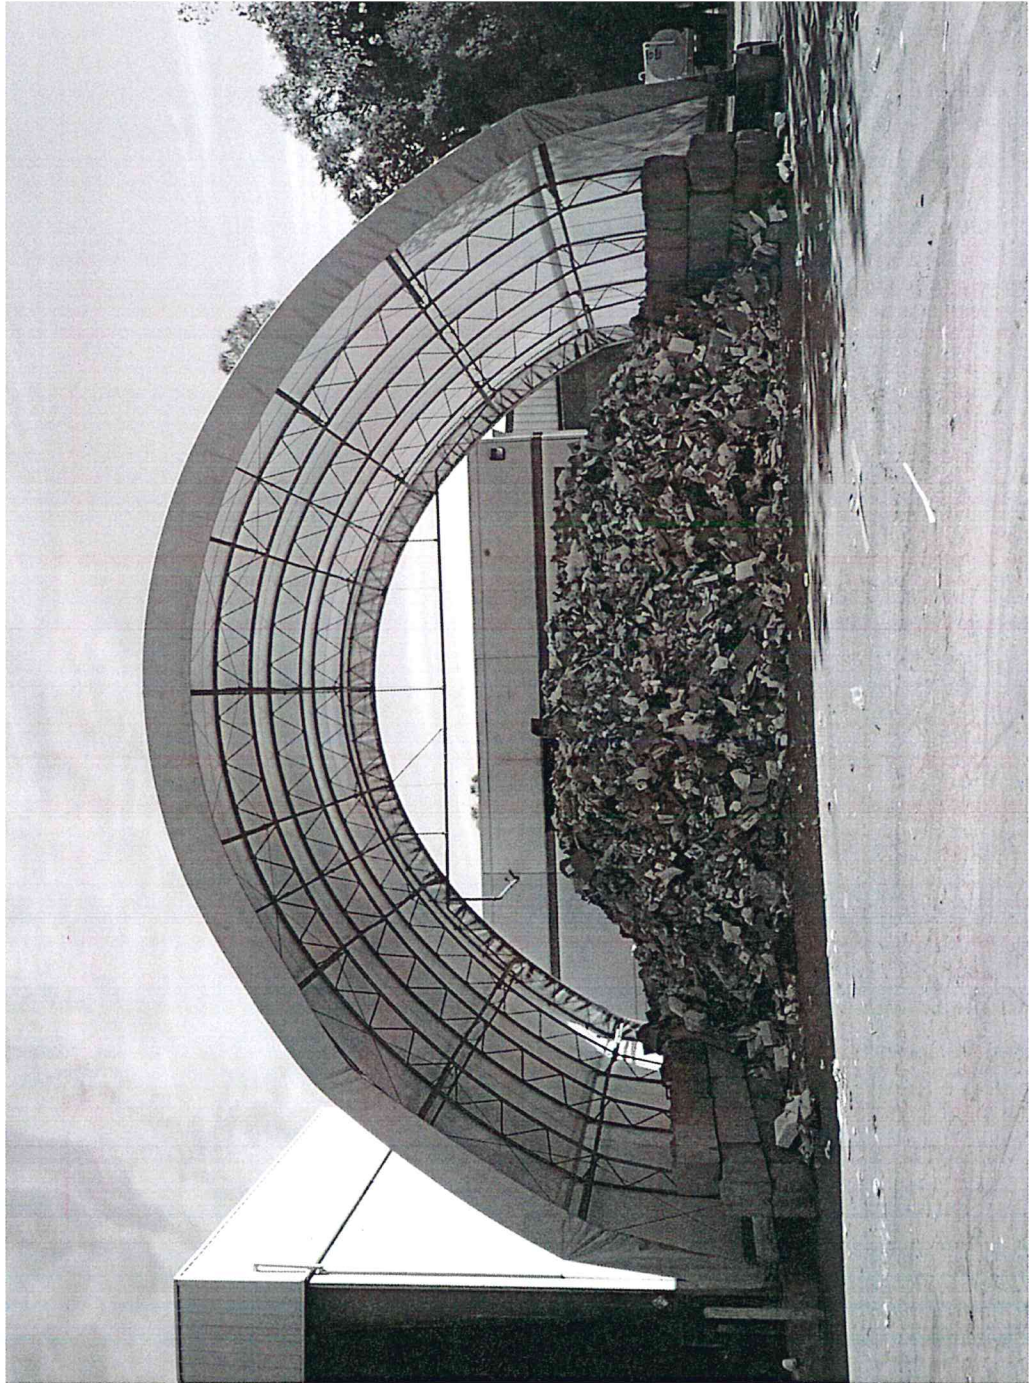

# OVERALL SMALL FOOTPRINT

# TIGHT SELF-HAUL DROP-OFF & TURN-AROUND AREA

# LIMITED MATERIAL STORAGE AREA

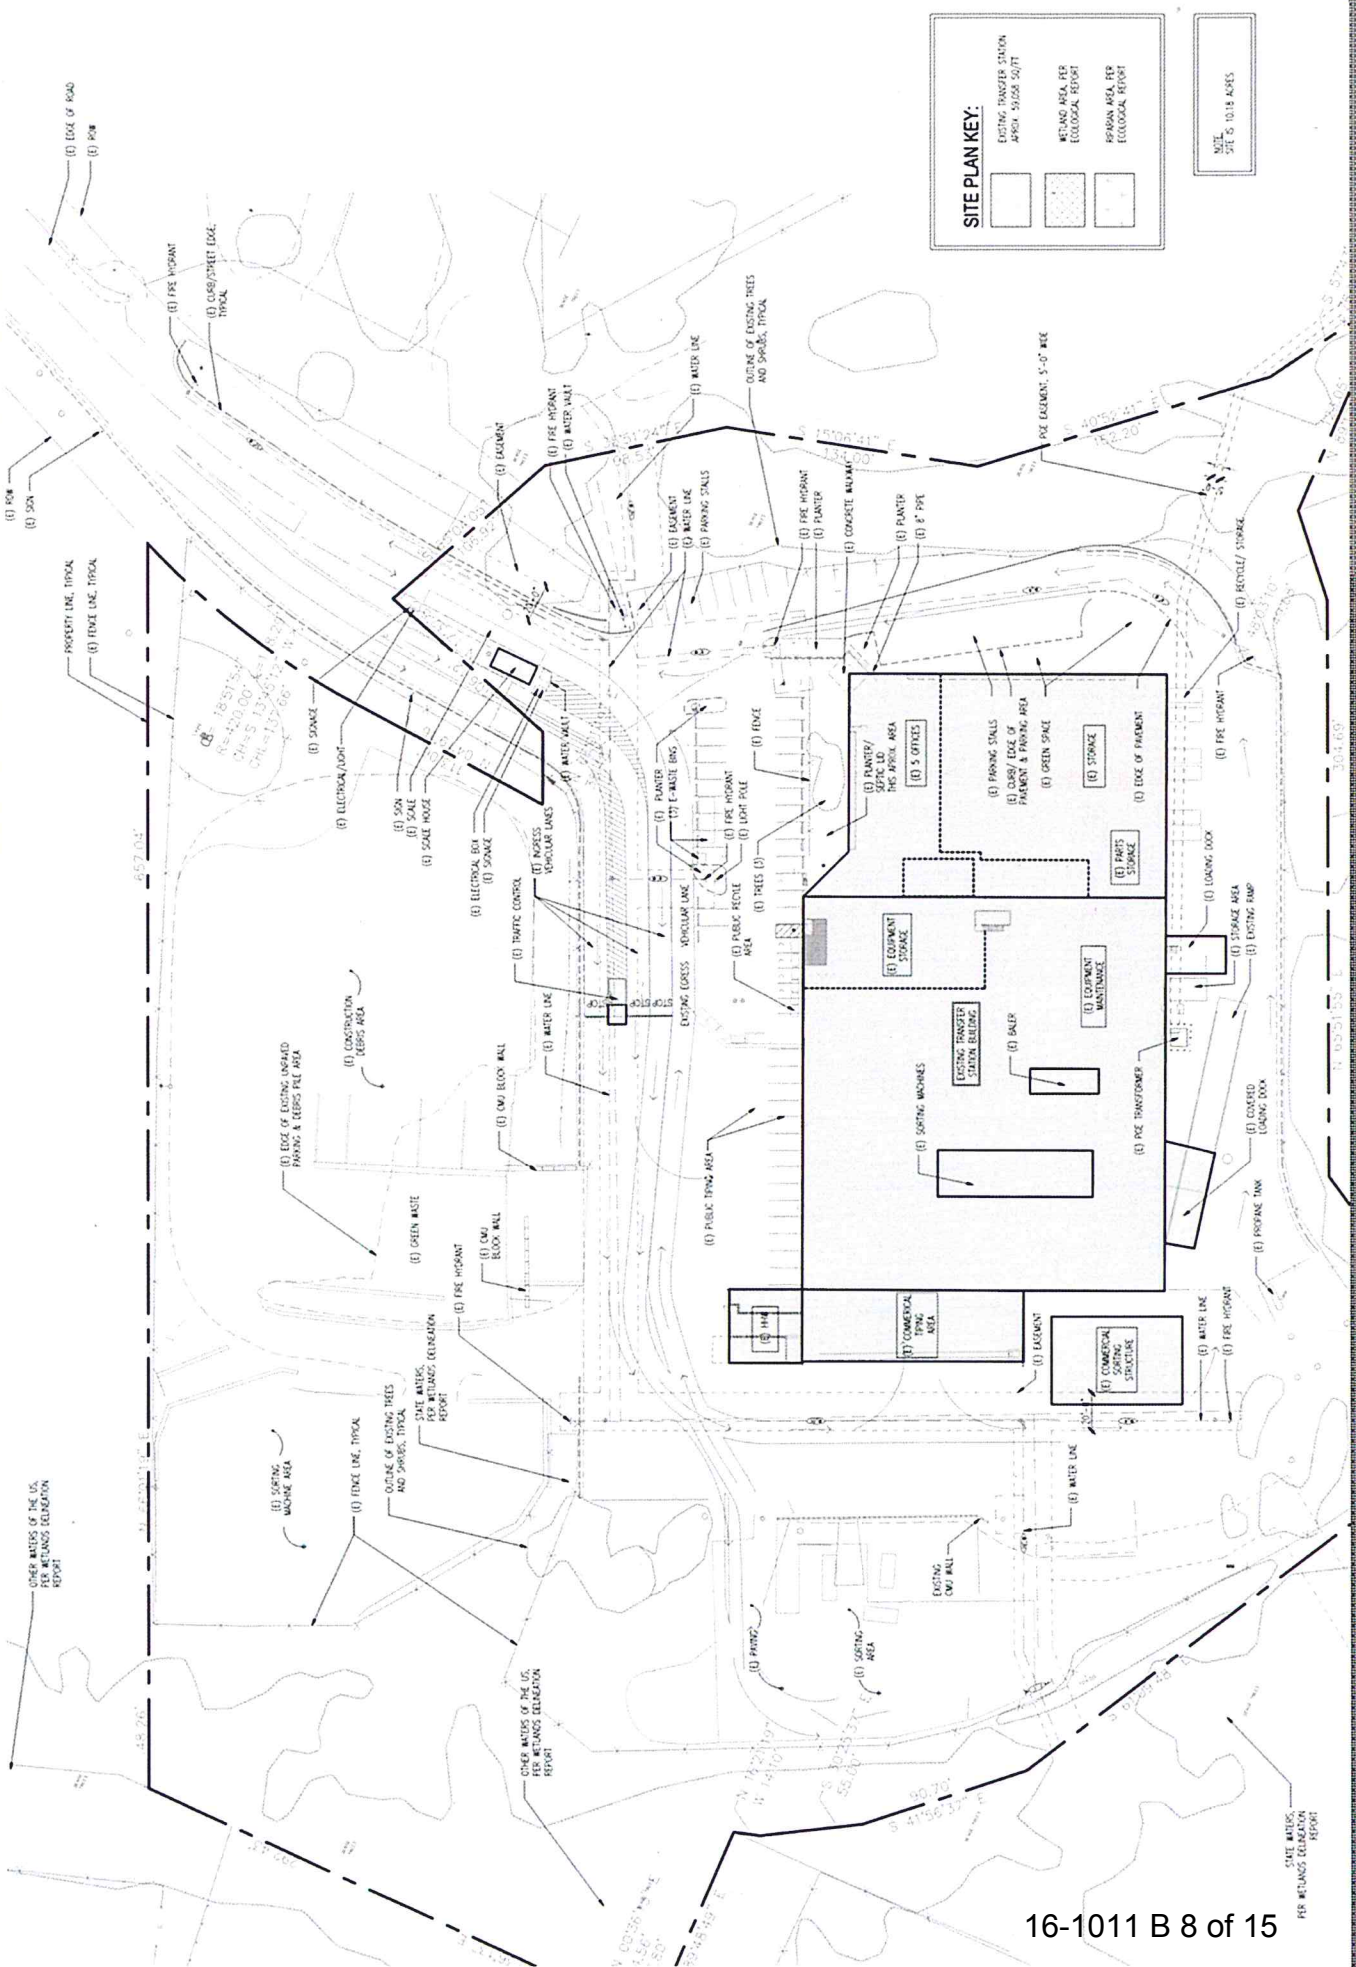

# TRANSFER STATION / MRF FACILITY PROJECT

The following elements are included in the proposed building:

- Separate tipping areas for commercial and public traffic
- Separate inbound scale for commercial vehicles to separate public and commercial traffic
- A drive-through transfer load-out tunnel to improve traffic flow and loading efficiency
- Both public and commercial vehicles will unload directly onto the floor, eliminating vertical drop-offs
- The proposed door arrangement in the building will allow for the public to use two sides of the building on weekends, which typically have a large number of public transactions but little or no commercial traffic
- New HHW facility with expanded hours
- Installation of new C&D sort line and equipment
- New public education center
- New facility will meet all new state storm water regulations, providing for coverage of all material

The new building will improve efficiency and ensure all waste handling operations occur under cover

# EXISTING SITE PLAN

**SITE PLAN KEY:**

- [Symbol] EXISTING TRANSFER STATION AREA, 5/12/08 50/71
- [Symbol] METAND AREA, REP ECOLOGICAL REPORT
- [Symbol] REPAIR AREA, REP ECOLOGICAL REPORT

SITE PLAN
