Dedicated Hosting Features that Matter to Your Success

Arm your site with the power and control of DreamHost's dedicated servers.

Extreme Performance

Dedicated servers from DreamHost use the best hardware and software available to ensure your site is always up, and always fast.

- > Comes with either HDD or SSD hard drives for lightning fast loading times.
- > Use your server resources how you want without having to share.
- > Rest easy with 24x7 DDoS protection and 2N+2 power redundancy.

100% Uptime Guarantee

Made possible by our multiple datacenter locations, redundant cooling, emergency generators, and constant monitoring.

24/7/365 Expert Support

Our experts are on standby for friendly, pro-level support 24/7, 365. No question is too simple or too complex.

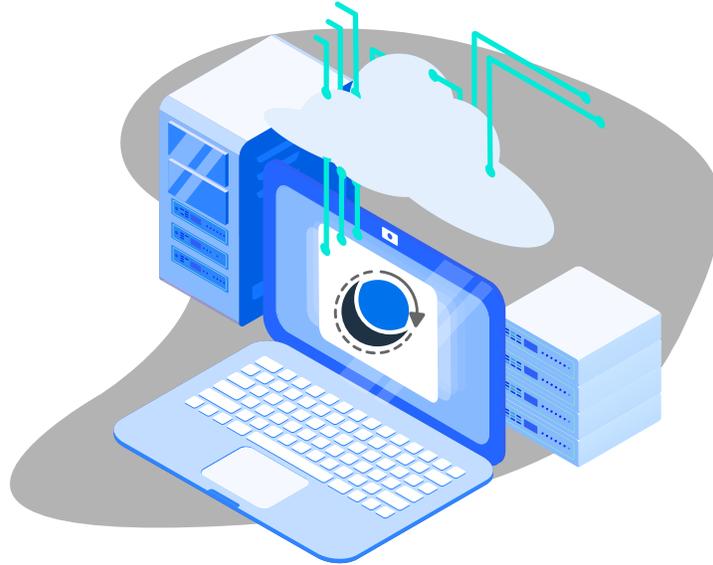

[Email Us](#)

Intuitive Management

Our custom control panel allows you to manage everything from **one place**.

- Full root & shell access (SSH) for maximum control.
- Reboot or powercycle your server whenever it's needed.
- Manage all the domains, websites, and email addresses you own.

Included with EVERY Dedicated Hosting Plan

100% Network Uptime Guarantee

We're so confident in our infrastructure that we back your site up with a 100% uptime guarantee.

24x7 Tech Support & Server Monitoring

Rest easy knowing your servers are under constant monitoring by our in-house experts.

Full Root & Shell Access (SSH)

Live the command-line life. Gain secure remote access and get down to business.

Ubuntu Linux

An familiar industry standard ready to go to work for you.

RAID 1 Storage

Provide your site visitors with increased performance and reliability.

DDoS Protection

Continue to serve your website visitors no matter what.

Uncapped Bandwidth

There are no limits on the amount of traffic your site or app can receive. All we ask is that you be nice and comply with our unlimited policy.

Reseller and Sub Account Features

Create an unlimited number of sub accounts to help you manage client accounts, client and contractor website access, FTP, and billing.

Ruby Version Manager (RVM)

Need more than one version of Ruby? RVM makes it easy.

OPcache

OPcache makes PHP scream by compiling your code once and storing it in memory. Silently. Always watching. Always ready.

PHP7/Perl/Python/Ruby

The gangs all here. Build something great.

Advanced, Easy-to-Use Panel

Our custom-built panel allows you to manage your websites, databases, email, and billing.

Unique IPv4 and IPv6

Get an IPv4 address and future-proof your account with an unlimited number of free IPv6 addresses.

Node.js

Node.js works best in a powerful VPS environment. Let your server-side JavaScript freak flag fly!

Local MySQL Server with Full Root Access

Our dedicated servers host MySQL databases locally instead of on a separate machine. This makes for faster queries to a database you're hosting!
