

DISASTER CASE MANAGEMENT

CALDOR FIRE RECOVERY 2022

Disaster Case Management

- We will serve as a client's primary point of contact to access and coordinate services.
- Assist the client with assessing and verifying complex recovery needs, and in planning and coordinating necessary services and available resources to re-establish normalcy.
- Assess the client's disaster recovery planning and progress. Disaster Case Managers rely on each client to play an active or lead role in his or her own recovery.

Disaster Case Management

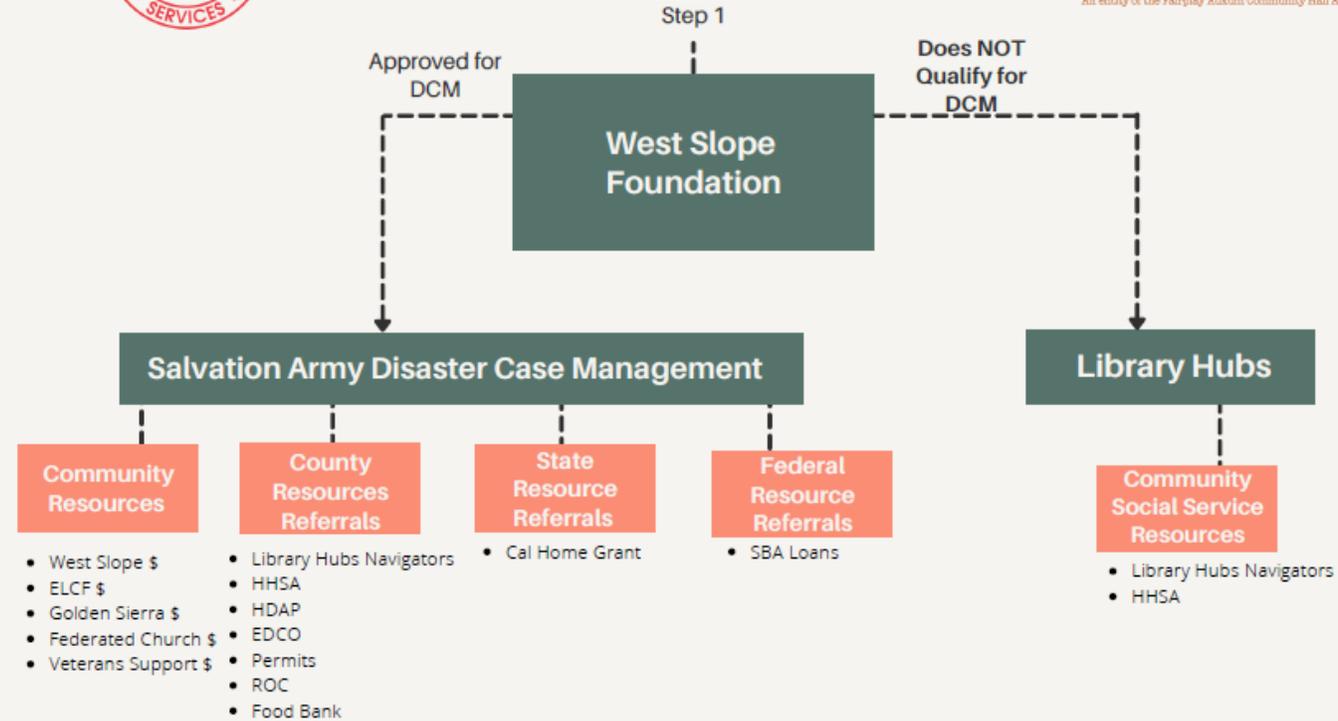

- Providing referrals for direct clients' needs to recovery (Rental assistance, Furnishings, Disaster construction, etc) to other Community Organizations playing an active role in Disaster Casework.
- Advocate on behalf of the client and their disaster recovery planning and progress; the potential impact of the disaster on clients' overall well-being and ability to cope; and the recovery needs of vulnerable populations after a disaster.
