Honorable Board of Supervisors,

I write to join the Planning commission in opposing the **Granite Creek Subdivision**, its Rezone and its Tentative Subdivision Map, due to come before you Dec. 05.

This proposed sprawl across 134 acres in deeply rural undeveloped countryside is a classic example of undesirable Leapfrog Development, plopping a giant development in open rural lands. If allowed, it would serve as a precedent, and 'anchor' this sector of the open space far south of Shingle Springs for subsequent developers to come in and say "me too". Such leapfrog development is against the intentions of the General Plan.

And such development is prohibited by the provisions of Measure E, now a part of the General Plan.

Now is the opportunity for the Board to take a stand against Leapfrogging and against ignoring Measure E.

Take that stand!

Richard Boylan, Ph.D.
