Comments Regarding: Conditional Use Permit S17-0005
Cal.net North in Georgetown Divide Area.

Dear Sirs,

Please DO NOT approve construction of CAL.NET broadband wireless communication towers in the Georgetown Divide area. These will significantly ruin our views, will clog our small roads during construction, and may cause deadly radiation exposure to residents. Brain tumors and heart tumors have been reported. Overpopulation will follow, and the Divide, one last little quiet refuge, will be destroyed. I am owner/trustee for three parcels that are directly impacted.

And for what purpose are the towers? So people can sit indoors on their backsides staring at computer with dancing cats, "fake news", teenage pornography and violent video games?

We move to and live in the Georgetown / Garden Valley area to get away from this garbage and to enjoy a clean environment, relative quiet, space and nature. If I want high speed internet, I can get a personal satellite dish. Keep the urban blight in El Dorado Hills, since over-development has already ruined it. Allowing these towers will kill the Divide area by destroying the reason we want to live here.
