Hello,

This relates to item 30, which is on the consent calendar. On the list are 12 different agreements, requesting a 12 month performance period extension. I picked one of them to research; Promontory Village 2C on it's 8th amendment.

The Final Map and Subdivision Improvements were signed and approved in 2017, with agreement that the improvements would be made within 2 years. This would put them 10 years past the original agreement date, with no new clear target.

There is no documentation on any of the 12 extensions to outline if any portion has been done, and what is still pending. Since these are public improvements, we don't know if there are impacts on other residents in the area for these not yet being done. Even if it is isolated to just the specific parcels, the extensions contribute to the continually languishing development agreements that people lose track of, only to be surprised once they finally start.

I recommend a deeper dive into the details of these requests and pursuit of completion, per the agreements.

Regards,

Linda K Campbell
