Dear Ms. Highborn and Commission Members,

I am submitting my application for membership on the Commission on Aging Advisory Council in a different method than the form I was given. My information is included in a resume, which I have tailored to include the sections on the application. My hope is that it is clear and addresses all the information that you seek.

Three weeks ago I requested the application and have been thinking about the concept of aging and reading more on the topic. Some of the of aging. I found the aging stage of life has issues and changes to work we work through. I read about "agism" with interest. Recently, I heard that El Dorado County is one of the most preferred retirement locations in the state and so the county's seniors are quite diverse. I am in the first group of "boomers" to turn 60 and being a boomer I think I have my own perspectives on aging.

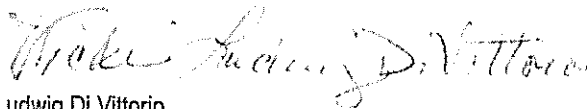

To complete the section listed as:

MY REASON FOR DESIRING TO BECOME A COMMISSION ON AGING MEMBER

Community service has always been a part of my life: while in college, as a mother, a community member, school parent, professionally and now in retirement. I feel community service leads to a better quality of life for the members and it is something easily given. Helping my community is its own reward. At this point in my life, I would like to play a supportive role for this age/stage I have moved into and I would like to make an impact for others aging in this county. There are aging issues I would like to research and learn about, weigh the facts and assist the Commission with when planning future.

Please review my qualifications. I would be available for your meeting on the 3rd Thursday of August, if I am selected for an interview.

Thank you for your consideration.

Vicki Ludwig Di Vittorio

REASON FOR DESIRING TO BECOME A COMMISSION ON AGING MEMBER

I am ready to use my skills and experience to improve the lives of people- I like volunteering. Through participation on the Commission on Aging, I hope to become more informed on issues and areas of concern of the aging population in this area.
