

## QUALITY CHILD CARE MATTERS

#28

### Lifelong Benefits

Children who participate in high quality child care programs are more likely to do better in school, pursue higher education or training, earn higher incomes and avoid high risk and criminal behavior.

### Education

Providers are trained in Early Childhood Education and participate in ongoing professional development. They listen to children with interest and plan activities that recognize each child's abilities.

### Environment

A quality environment for children is healthy, safe, and well supervised. There are plenty of opportunities for physical activity, ample space to play, and active hands-on learning experiences.

### Respect

Each child's unique qualities and interests are respected. Providers interact with children in ways that encourage positive social behaviors and providers value parents as partners.
