Dear Board Members,

Additional road capacity improvement projects should be added **"BACK"** to the TIF program in El Dorado Hills. I say added back because 8 years ago many projects were removed from the TIF fee program in order to lower the building permit fees for EDH homebuilders.

For instance, there is a very clear relationship between the growth that is entitled in EDH south of 50 and the need for additional road capacity. Accordingly, TIF projects widening Latrobe Road and White Rock Road should be added to the TIF fee program.

I have said the same thing about Bass Lake Road in the past.

The public will lose confidence in County Government if your Board does not significantly increase the TIF fees and widen the roads in EDH.

Joe Harn
