**EHR PROGRAM**  
**Participation Agreement**  
EXHIBIT A – PROGRAM DESCRIPTION AND FUNDING ALLOCATION

**I. Program Objective and Overview:**

CalMHSA will develop and manage a Request for Proposal (“RFP”) process to select a vendor to deliver a California-centric enterprise solution for electronic health records (the “EHR Program”). The EHR Program will be designed to be configured and implemented across multiple counties.

The EHR Program will be grounded in clinical best practices, state objectives such as CalAIM, and unique business operational needs of the California county-based behavioral health system, and will act as a catalyst for better use of data to drive performance outcomes. By introducing a common enterprise system that is inherently based upon pre-defined workflows, the EHR Program will provide CalMHSA and the Program Participants with the ability to implement centralized application management service, application support services, end-user training, revenue cycle management services, project management and other professional services. The Program, and the application of centralized services to support multiple counties, will provide for more efficient use of resources, better clinical outcomes, improved adherence to state requirements and reporting, and better overall justification of state spending on specialty mental health and substance use services.

**II. Participant's Participation:**

Participant will take an active role in the Program, including but not limited to, participation in stakeholder groups and advisory groups, testing, and implementation.

**III. Funding Allocation:**

Initial funding for the Program is based upon the following allocation by County population:

- a. Los Angeles County: \$250,000
- b. Large: \$150,000
- c. Medium: \$100,000
- d. Small: \$50,000
- e. Frontier: \$35,000

Any additional funding requests provided by CalMHSA to the Program Participants will utilize a similar allocation.
