Dear Supervisors:

*'Expanding the list of roadway segments allowed to operate at LOS F'* is a General Plan amendment, not a line item in an attachment buried in an update.

Please clarify if there is indeed a proposed list of roadways to be added to those sanctioned by the Board as operational failures, as indicated in line item #26, and confirm the status of such a proposal. Also, please note that this is *not* a mitigation for traffic congestion so much as a blessing given for lack of planning.

| 26 | Completed | TC-F | Develop and implement a countywide program to annually monitor county road and state highway segment and intersection conditions to ensure that acceptable Levels of Service are maintained. | 5.4-1(c), 5.4-2 | Expand list of roadway segments allowed to operate at LOS F. |

**and two..**

Not to sound 'shrieky' on this, but to see in print that Long Range Planning and the CDA are calling line item #14 on Community Regions 'complete' is seriously offensive.

We have been trying to have this conversation since before the Notice of Preparation for the TGPA in 2012. We have been ridiculed in multiple forums for presumably not understanding what the General Plan update is (...and is not...) all about. The last action on this was in February, when the Board removed this item from the TGPA to follow a separate path with a separate EIR, and staff was directed to come back in 3 months with a plan (..yet again, I might add). I was informed this would be back on the agenda for June 24th.

Then this appears buried in an attachment under Agenda item 63:

*"..working with Community groups to identify appropriate uses for such parcels, including residential development.."* is complete?! **Please clarify.**

| 14 | Completed | LU-K | Develop and maintain an inventory of vacant lands within each Community Region and Rural Center. This would include working with community groups to identify appropriate uses for such parcels, including residential development and establishment of communities |  |  |
