Ms. Graziano,

Thank you for your email. I will forward it to our Administrative Team so that it is properly recorded as a public comment on the project.

Dear Mrs Carrico,

My name is Josie Graziano and I live in Blackstone with my husband and children. I received a notice regarding this project (cup19-0005) by Vierra Moore. I talked to Mike Baron from EID with my concerns about this project also. I would like to provide you with comments to be documented regarding my concerns.

-We already have to deal with the awful odor from the Waste treatment plant and now also diesel fuel for your big trucks and who knows what else.

-We not only have to deal with the not so visually aesthetic Waste treatment plant but now with another building with supplies and big trucks parked on Latrobe that people drive through and see to get into our neighborhood. Can't imagine what that will do to future house values. Who's going to purchase a home near all this! Seems to me you can find somewhere far from homes and more discrete location.

-This will also make the already congested Latrobe worse! My children drive this road everyday and big trucks will only add to this problem.

-There also is another project on the other end of Blackstone where there will be moving debris from Placerville recycling plant stored (forgot the name). They will also have many trucks going down Latrobe which will add even more traffic and air pollution!

Air quality is also a concern with All These projects.

Thank you

Josie Graziano
