Service	Description
OPT-E-MAN®	<p><b>OPT-E-MAN® Service.</b> ("Service") OPT-E-MAN® Service provides a fiber-based service that transparently interconnects two or more Customer locations within a Metropolitan Area Network (MAN) as if they were segments on the same LAN using packet-based switching technologies. The Service provides dedicated bandwidth from 5 Mbps up to 1 Gbps. If Customer connects to the OPT-E-MAN network using a bridge or switch for Layer 2 connectivity, only 50 Media Access Control (MAC) addresses can be used per Layer 2 device, per port.
