Subject: 2012 Traffic Impact Mitigation Fee Funded Capital Improvement Program Projects

At the August 28, 2012 Board of Supervisors hearing, staff was directed to provide a list of Traffic Impact Mitigation (TIM) Fee projects and a map that correlates to the list. The County roadway projects will be analyzed using the Travel Demand Model (TDM). The roadways will be discussed at the September 25, 2012 Board of Supervisors hearing as part of the TDM update.

As part of the discussion of the County roadway projects, the Department of Transportation (DOT) has provided four maps of TIM Fee funded projects in the 2012 Capital Improvement Program (CIP).

The 2012 TIM Fee funded maps identify:

- Map 1: All TIM fee projects in the 20 year CIP
- Map 2: Projects currently in construction or scheduled to be completed in the 5-Year CIP work plan;
- Map 3: Projects scheduled to be completed within the next 6 to 10 years; and
- Map 4: Projects scheduled to be completed within the following 11 to 20 years

Tables have been included, both in alphabetical and project number order, to describe these projects in further detail. The tables include the following information:

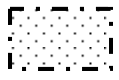

- Project name
- Project number
- Project type
- Existing and year 2025 lane configurations
- Road segment limits for applicable projects
 - Widening projects
 - New Roads
- Project cost in millions
- General location of the project

On Monday, staff will release another map and an additional table that correlate Figure TC-1 (the circulation map as adopted in the 2004 General Plan) to Exhibit B (the complete list of projects in the TIM Fee Program).

cc: Kim Kerr, Interim Director, Department of Transportation
Steve Kooyman, Acting Deputy Director, Transportation Planning and Land Development Division
