Dear Public Servants ~

As a voter and community volunteer I want to express my views on the protection of our oak woodlands as further housing and business development expands in our county. I am not opposed to development per se, but I am concerned that our unique environment—its beauty and its wondrous natural variety—be preserved as development expands. I count on all of you to give voice to the voiceless trees and animals who are our neighbors in El Dorado County.

I have lived in a lot of beautiful places—Dunblane, Scotland; rural New Jersey; Marin County—but have chosen to settle here in part because of the trees. Please protect them!

Re: County Policy of Importance to the  
Oak Woodlands
