Buckeye Hotel ; the meeting was called to order by L. B. Curtis, Esq., Justice A. A. Stoddard was elected Chairman, and S. S. Buckeley Secretary ; a committee was appointed to draft resolutions expressive of the feeling entertained towards the deceased, on account of his untimely death, recognized his zealous, worthy and enterprising character, his moral character being above reproach, and his absence from society hardly to be filled as he had but few his equals as a citizen and friend. Finally, expressing their sympathy with the relatives in the Atlantic States: which resolutions were unanimously adopted. Dr. Neison got and preserved the head of a Swede, who had been hung here, which had been separated afterwards from the body with a spade.

Greenwood Valley was by far more fortunate than its sister mining town, as far as the destruction by fire is concerned ; the first fire of any magnitude originated in Charles Nagler's house, where it was caused by an ash barrel standing at the corner of the house, and laid the entire business part of the town in ashes, in 1856. On February 3d. 1876, at an early hour, a box filled with combustibles etc., was discovered on fire and placed to the front of Felice Ricci's store, and had it not been for Chas. Nagler's watchdog, whose restless noise alarmed the clerk sleeping in the store, there would have been a big blaze, but under the circumstances it only could be called a close call, as the flames were subdued in time with the assistance of some neighbors. Nothing could be found out about the originator, and whether it was done with the intent to burn the town and get a chance for robbing or to gratify a personal grudge against Ricci. There speaks a great probability for the latter argument, however, if we consider the circumstances under which the premises of Messrs. Nagler and Ricci were set on fire June 3d, 1878; about two years afterwards, and residences, stores, etc., with all contents were totally destroyed ; hardly anything could be saved. The fire evidently was the work of an incendiary. Loss \$16,000.

RE-FERENCE TO FIRE-TOWNSHIP BIRTH GREENWOOD-CALIF.

Greenwood Valley is one of those mining towns that have understood to preserve quite a lively appearance, though not many of the old timers are left here. There is Orlando Shepherd, a native of Chillicothe county, Ohio, who came to California in 1850, and to Greenwood on March 31st, 1851 ; Jno. Daniels, better known as "Scotty," a native of Scotland, who came to California on board of a vessel in 1839, Lewis B. Myers, of the Chimney Rock ranch ; and Wm. Harris. The present population numbers about two hundred, supports three stores, two hotels ; one blacksmith shop, butcher shop and one brewery ; the first brewery was started by Jacob Winkelman.

The farming done in the township is not considerable and consists to the greater part in hay making. The principal support consists in mining, and there are the richest mining claims close onto town. The Nagler or French claim, first discovered by Mr. Sheperd, is a seam mine, worked after the hydraulic process, developing richer in greater depth. Mr. Desmarchais is the superintendent of the mine, with which a stamp mill is connected to crush the larger rock, and work the vast pile of tailing over. North of the French claim there is the Bower mine, run by eastern capital and pushed with great vigor. A Chinese agent some years ago came up here from San Francisco, offering the sum of \$100,000, for this property as it stood at the time, while about a year before that, it could have been bought for perhaps \$15 or \$20. The Chinese however were not the only ones who had found out the value of the mine, tests had been made to determine its extent and value, which had proven satisfactory to the owners, who decided not to sell for the sum offered. The Argonaut mine, upon which as long as 1852 prospecting was done to a limited extent in search of the quartz ledges, as from surface working course gold had been obtained in very paying quantities for years past, was lately sold to San Francisco parties, who have undertaken to make a thorough practical test of extent and value of the ledges of this mine, which, though most gratifying indications are given, as yet did not expose no well defined lode upon which to settle for working.

### EL DORADO COUNTY PLANNING SERVICES ENVIRONMENTAL QUESTIONNAIRE

Project Title Cal's market + B&B Lead Agency \_\_\_\_\_  
 Name of Owner Vincent J Cal Telephone 530 823-8826  
 Address POB 267 Greenwood CA 95635  
 Name of Applicant Vincent Cal Telephone 530 823-8826  
 Address POB 267 Greenwood CA 95635  
 Project Location 4031 main st Greenwood CA 95635  
 Assessor's Parcel Number(s) 074-173-01 Acreage 2+ or - Zoning \_\_\_\_\_

Please answer all of the following questions as completely as possible. Subdivisions and other major projects will require a Technical Supplement to be filed together with this form.

1. Type of project and description:

Neighborhood market + Bed + Breakfast

2. What is the number of units/parcels proposed? 2 - two

#### GEOLOGY AND SOILS

3. Identify the percentage of land in the following slope categories:  
 0 to 10%     11 to 15%     16 to 20%     21 to 29%     over 30%
4. Have you observed any building or soil settlement, landslides, rock falls or avalanches on this property or in the nearby surrounding area? no
5. Could the project affect any existing agriculture uses or result in the loss of agricultural land?  
no

#### DRAINAGE AND HYDROLOGY

6. Is the project located within the flood plain of any stream or river?  
 If so, which one? no
7. What is the distance to the nearest body of water, river, stream or year-round drainage channel?  
1/2 mile Name of the water body? Drainage
8. Will the project result in the direct or indirect discharge of silt or any other particles in noticeable amount into any lakes, rivers or streams? no
9. Will the project result in the physical alteration of a natural body of water or drainage way?  
 If so, in what way? no

10. Does the project area contain any wet meadows, marshes or other perennially wet areas?  
NO

**VEGETATION AND WILDLIFE**

11. What is the predominant vegetative cover on the site (trees, brush, grass, etc.)? Estimate percentage of each: 15%

12. How many trees of 6-inch diameter will be removed when this project is implemented?  
None

**FIRE PROTECTION**

13. In what structural fire protection district (if any) is the project located? Goodmanville

14. What is the nearest emergency source of water for fire protection purposes (hydrant, pond, etc.)? Hydrant 150 ft

15. What is the distance to the nearest fire station? 1 mile

16. Will the project create any dead-end roads greater than 500 feet in length? NO

17. Will the project involve the burning of any material including brush, trees and construction materials? NO

**NOISE QUALITY**

18. Is the project near an industrial area, freeway, major highway or airport? NO  
If so, how far? \_\_\_\_\_

19. What types of noise would be created by the establishment of this land use, both during and after construction? None

**AIR QUALITY**

20. Would any noticeable amounts of air pollution, such as smoke, dust or odors, be produced by this project? NO

**WATER QUALITY**

21. Is the proposed water source  public or  private,  treated or  untreated?  
Name the system: \_\_\_\_\_

22. What is the water use (residential, agricultural, industrial or commercial)? Residential

**AESTHETICS**

23. Will the project obstruct scenic views from existing residential areas, public lands, public bodies of water or roads? NO

**ARCHAEOLOGY/HISTORY**

24. Do you know of any archaeological or historical areas within the boundaries or adjacent to the project? (e.g., Indian burial grounds, gold mines, etc.) no

**SEWAGE**

25. What is the proposed method of sewage disposal?  septic system  sanitation district  
Name of district: \_\_\_\_\_

26. Would the project require a change in sewage disposal methods from those currently used in the vicinity? no

**TRANSPORTATION**

27. Will the project create any traffic problems or change any existing roads, highways or existing traffic patterns? no

28. Will the project reduce or restrict access to public lands, parks or any public facilities?  
no

**GROWTH-INDUCING IMPACTS**

29. Will the project result in the introduction of activities not currently found within the community?  
no

30. Would the project serve to encourage development of presently undeveloped areas, or increases in development intensity of already developed areas (include the introduction of new or expanded public utilities, new industry, commercial facilities or recreation activities)?

unknowe

31. Will the project require the extension of existing public utility lines? no  
If so, identify and give distances: \_\_\_\_\_

**GENERAL**

32. Does the project involve lands currently protected under the Williamson Act or an Open Space Agreement? no

33. Will the project involve the application, use or disposal of potentially hazardous materials, including pesticides, herbicides, other toxic substances or radioactive material?  
no

34. Will the proposed project result in the removal of a natural resource for commercial purposes (including rock, sand, gravel, trees, minerals or top soil)? no

35. Could the project create new, or aggravate existing health problems (including, but not limited to, flies, mosquitos, rodents and other disease vectors)? no

36. Will the project displace any community residents? no
