All,

Please read the whole chain.....

Hi Kathy,

Seriously, you think the homeowners need to bear the cost.....you are wrong, the property owner needs to bear the cost!! And that is the Rescue School system who has a reserve of ~6M to build their school.....no school takes that much!!!

I as a neighbor will not accept increased fees

Rescue School system needs to do the right thing

It took one resident in Folsom to complain about losing fish in a natural wetlands, and Folsom is flushing hydrants to fill to a degree before winter.

It takes EID no effort to fill Bass Lake, but monies need to be made available by Rescue School system.....the owners

Respectfully,

Dan and Corrine Taylor

Hi Corrine:

I know there is a lot of concern in the neighborhoods around Bass Lake because the lake is evaporating before our eyes. John Thomson and I have met with EDC Fish and Game Commission members twice now with Supervisor Mikulaco to discuss the Bass Lake situation. Supervisor Frantzen attended the last meeting which was just a couple of weeks ago.

So, we have been working on the situation emphasizing the concerns of the neighborhood and the fact we feel the neighbors would step up to help finance putting water in the lake if necessary which will not be cheap by any stretch of the imagination. On top of the water situation, there has been the rezoning issue brought forward because of EDC's plans to update their zoning codes to make them consistent with the 2004 General Plan. This was very serious because of the long term ramifications of the proposed rezoning and has taken a lot of time and effort to this point, three years to be exact.

We don't talk about a lot of these issues because they are so confusing to the average home owner and I have really gotten educated just on the one piece of property. We are not finished working on this as it still has to go to the BOS in November and they could choose not to agree with the Planning Commission. Plus we are studying if the current zoning on the Bass Lake property is really appropriate or not.

We are discussing what we can do to organize the concerned neighbors. The Fish and Game Commission wants to take the lead on the water issue at this point. They have been doing studies at the lake for many years and are closely monitoring what is happening.

So while I know it feels like no one is doing anything, we really are but we have to work within the county framework and of course, they don't even own the property and apparently do not want to own the property. It feels very frustrating to me too so you are definitely not alone. Bass Lake is very unique and deserves to be conserved and preserved for the future residents of our area.

Have a great week, Kathy P.

Subject: FW: Dixon Ranch draft EIR is still available for public comment!

Please see email chain and help.....I can't believe I'm the only one that cares.....I work full time and can't do much more than email.

Bass Lake is dying and Rescue School district should be held accountable for the cost of EID filling the lake.....see chain and please help!

I am absolutely buried in the General Plan and Zoning Update (TGPA/ZOU), which proposes to rezone that property as one of 37,000 parcels also being impacted.

The TGPA/ZOU goes to the Board Nov 10; I'm not personally able to lead another battle, but you can contact the Bass Lake Action Committee and offer to help them. Like us, they would love to have assistance, and they are dedicated to the lake - they could likely help direct people on how to be most constructive and who to talk to.

It really is hard for me to imagine that a group of dedicated residents making themselves *really* loud could not get RUSD, EID and Fish&Game to coordinate to put one sizeable dump of water in there before it's too late. I just do not have time to make that happen myself.

Are you on Facebook that you can post to other sites and help spread the word? EIDoradoCOWatch, DebatingEIDoradoLocalPolitics, or some others that have a good following might draw people in. There's also the group frustrated over Deer Creek drying up and EID's part in that; they might be good to team up with too.

Don't you think it is about time that we hold Rescue School district responsible for Bass Lake...

EID should fill and charge them; minimal cost for the life benefit of all the animals and fish!!

Edcgov.us Mail - Bass Lake

It took one resident complaint in Folsom to fill one retention pond in their area.

Can you please help support the life of Bass Lake!!

Always,

Corrine
