victor.vallejo@me.com has sent you the following message about your classified ad:
It's very unfortunate that this tower plan was shut down because of health concerns.... I really feel as though this would help provide better mobile service to the people of south lake tahoe and the tower would not be noticed if concealed properly. Are the people of skyline drive aware that there is already a cell phone tower up there broadcasting a signal over the houses?? T mobile owns a tower up on skyline DR and has for many years. I really hope att appeals this and gets the chance to build the tower up there so service can improve for everyone because service is terrible in that area of Meyers Ca.

Subject: Special Use Permit S14-0009/AT&T Cell Tower Skyline Drive

To: planning@edcgov.us

To whom it may concern, I saw that at&t mobility was searching for a new place to put a cell tower to improve coverage in the south lake tahoe area... i think this would be a great spot for a new tower to be placed because it would provide coverage to a lot of the dead zone areas of tahoe and meyers. I saw that the plans for the tower were shot down by you the commission and by the people that live in the area. Are you and the people aware that there is already a cellular tower operated by t-mobile and has been for years??? why has there been no health concerns with the tower that is already there?? I really believe you should allow att to build a tower here to improve coverage gaps that we all hate. Att would make this tower very aesthetically easy on the eyes and most would not even know its there. Again i really hope you reconsider the denial of this request because technology isn't going away and we all need to embrace it.

-Ive attached a google street view of the t-mobile tower that is operated on Skyline dr. by t-moible... As you can see it blankets all the residential houses in the area, yet there is still a concern for this new tower...

Sincerely

Victor Vallejo - Born in raised in Tahoe with a love for tech
