Dear Supervisor Dupray:

Have you received our letters (Dec.17 and Jan.7) regarding Village M? I don't believe the Planning Commission would have approved this project if they had been given this information. The state requirements for noticing are clear, and they were not met for the Planning Commission meeting. We don't understand how this project can still be on the agenda for Board hearing on Tuesday.

We met with Mel Pabalinas on Wednesday, and he really couldn't answer our questions. He deferred to Gina, who has not been available (I understand; we are all very busy). We haven't had access to the file yet, and it may not be available prior to Tuesday. Isn't this what the Planning Commission review period is for? We had agreed to meet with Andrea Howard (the applicant) after getting our info from the county, but we haven't been able to even see the file as of this point.

In case you don't recall, I work for the county as well and can be reached at extension -3631, if you have any information for us. We are pretty frustrated, and would so appreciate any help you can give us in extending the review period. Planning Services needs time to do their homework as well.

Thank you-
Ellen Van Dyke
