El Dorado County Sheriff  
Atten: Anthony Prencipe

Ref: AeroVironment, Inc. Sole Source

To whom it may concern:

This letter is notify you that AeroVironment, Inc acquired Telerob Robotics on May 3<sup>rd</sup> of 2021 and as such is the sole provider and manufacturer of the Telemex line of robotic systems, accessories, batteries, and software. AeroVironment, Inc has locations across the United States, providing service and training to our ground robotics customers out of our Erie, PA office. We are also the only supplier and manufacturer authorized to do repairs, upgrades, or service on this product. Any repairs, modifications, or maintenance performed on AeroVironment Telemex systems by any entity other than AeroVironment or its authorized representatives will immediately void all warranties and relieve AeroVironment of any responsibility or assumption regarding the proper operation, performance, or safety of the equipment.

The Telemex line of robotics distinguishes itself from its competitors in the field by utilizing:

- 6-axis precision manipulator – using inverse kinematics to allow for the manipulator to be intuitively controlled from one joystick.
- Tool Center Point Control—providing maximum movement flexibility of the manipulator while keeping the gripper on a fixed plane until the operator tells it otherwise
- Automatic tool exchange—double payload bay allowing for retrieval of necessary HDT tools such as window breakers, cameras, disrupters, breaching charges, and powered cutting tools.
- HD Pan/Tilt/Zoom cameras—displays four video feeds (QuadView)
- Versatile 4-track drive system—handles gradients/obstacles/gaps and features self-leveling functionality to ensure the platform is in a stable configuration while using the manipulator
- Easy access to pre-programmed manipulator and flipper motion sequences
- IP Mesh Radio Network with optional repeaters provide secure and resilient communications over extended ranges.

Please feel free to contact me with any questions regarding the manufacturing, distribution, or capabilities of the Telemex line of unmanned ground vehicles.

Respectfully,

A handwritten signature in blue ink, appearing to read 'Gina Driscoll'.
