Hello,

The El Dorado Hills Area Planning Advisory Committee [EDHAPAC] reviewed the project files for CUP18-0006 El Dorado Disposal Recycling Facility at our September 2018 and October 2018 EDHAPAC meetings.

Beginning on November 3, 2018, EDHAPAC started receiving dozens of public comments on CUP18-0006 from El Dorado Hills residents through the contact form on our website [<https://edhapac.org>] - We're reaching out to these residents to advise them that public comments in regards to CUP18-0006 should be submitted to the Planning Commission for review prior to the November 8, 2018 hearing at the Planning Commission.

Since the public hearing regarding CUP18-0006 is scheduled to occur in a few days, in an effort to make sure that these public comments are included for the Planning Commissioners' review, we've combined them into a single PDF file, including the senders' email addresses, time stamps, and comments. We can also provide them as 28 individual PDF files, if that would better serve the needs of the Planning Commission, prior to the November 8, 2018 hearing.

Warm regards,

John Davey  
2018 El Dorado Hills Area Planning Advisory Committee Vice Chair

Message Body:

Please don't put a waste facility in EDH near Blackstone and Heritage. These types of businesses need to be far removed from humans: noise, odor, pollutants, congestion from large trucks etc. The people of EDH need to be heard on this one. No one will approve of this.

Message Body:

I wish to express my disagreement with your proposed conditional use permit for a waste sorting facility at end of Westell/Oviatt Roads in El Dorado Hills and to request you do not proceed with the permitting process. We do not want you to build a waste sorting facility so near to existing residential properties. You need to find an alternative site further removed from residential areas. Please do not approve this permit and do not build this facility. Kindly find a more suitable location that would be acceptable to your customers. The proposed location is not acceptable.

Subject: Waste Plant To Move Near Blackstone

Message Body:

Hi There,

While I understand that the waste plant must go somewhere, I would think placing it anywhere near an elementary school and residential housing would raise serious alarms about potential allergens and health issues.

The last thing EDH needs is to make the news like other cities in America for creating some kind of preventable health issue.

Unless plenty of tests have been done ensuring that what this will release into the air and water supply is 100% safe - why risk it? Particularly with the elementary school right here - this seems like a total disaster in the making.

With all the land out here - there must be an area out of the way that is better suited for this waste plant. Hopefully, you're able to come up with another solution - to avoid any potential health and PR disasters.

Best

Erica Jabali Family  
Blackstone Residents

Message Body:

We were informed about the waste facility that is being built by Blackstone. My daughter has asthma and severe allergy when we were next to a treatment facility in San Diego. We moved out to EDH to avoid such issues. How is it possible that you have scheduled to place this in our neighborhood without getting clearance from the local residents. This is completely unacceptable. We have over 1300 homes in blackstone and I can assure you we will hearing from us.

Subject: Green waste and construction waste facilities

Message Body:  
I am very concerned about the proposed green waste and construction waste facilities proposed by EDH APAC. I suffer from pollen and dust allergies, and I suffer severe asthmatic symptoms from mold spores. Since the prevailing winds come from the southwest the proposed location of these facilities will subject all of El Dorado Hills to never ending air born construction dust and pollen. Just think of all the mold spores that will be added to the air from vegetation that has been rotting for up to 20 weeks in green waste containers. Since El Dorado County is so large there must be many location that you could build your facilities that would not impact such a large density population like El Dorado Hills.

Message Body

I understand you will be making a decision on building a waste facility close to Heritage in EDH.

I strongly urge you to reconsider building such a facility so close to our Heritage Development. I, and my family, suffer from allergies, and it's one of the main reasons we left our prior home in the Bay Area to move to EDH. This facility will also impact the value of my new home.

Please don't build a waste facility near Heritage in EDH.

**Subject:** Proposed Waste Disposal Site

**Message Body**

We do not want a new waste disposal site located on Latrobe in El Dorado Hills. My husband and I both have severe allergies and having such a waste disposal site nearby is going to be a health hazard for us. In addition, this site is too close to existing homes in Blackstone and the new senior community of Heritage. This will have a very negative effect on the property values on these communities. It should be located well away from existing high density housing.
