

# 5 Year Capital Overlay and Rehabilitation Program (CORP)

## 5 Year Capital Overlay and Rehabilitation Program (CORP)

DOT's Maintenance Division plans to overlay and rehabilitate as many of the projects as possible on its project priority list (see table next page), given available funding. CORP projects are dependant on unpredictable and sometimes, one-time sources of funding (e.g., the County's General Fund, special grants, Federal "stimulus" funding, etc.) This year, the El Dorado County Transportation Commission (EDCTC) has allocated to DOT approximately \$1.9 million of the \$2.8 million funds available from the Federal "American Recovery and Reinvestment Act (ARRA)". (The remaining \$0.9 million has been allocated to the City of Placerville.) In addition, DOT will receive approximately \$350,000 from the County's General Fund to undertake an overlay project in Tahoe. The projects receiving ARPA and General Fund monies will enable DOT to overlay the projects highlighted in the table (next page). Project summaries are included for these projects following the table.

DOT prioritizes CORP projects based on several criteria including pavement condition, traffic volume, and traffic circulation.
