

## LATE DISTRIBUTION 4-28-14

Sacramento County Environmental Coordinator

Mather Airport Expansion

I am writing to express my concerns regarding the Revised Draft EIR for the Mather Airport expansion and how it will effect outlying areas, especially an area of El Dorado County.

As a longtime resident of Coloma, CA, I have experienced the lull resulting from the Mather base closure and then the increased air cargo flights over our house..

First there have been no noise studies here in the Coloma Valley. Being in a narrow river canyon, the overflight noise at times is greater than the background noise from whitewater rapids of the American River. The reverberation is so great that, in a newly built home with dual pane windows and excellent insulation, it seems that a freight train is coming at you.

The State of California's Marshall Gold Discovery Park, the place where gold was first discovered, is our neighbor.

As part of the Fourth Grade California History program, over a seventy thousand fourth grade students visit the living history programs at the park each year. I have witnessed on numerous occasions when the Docents must stop their talk to let the noise from the air cargo transport plane pass. Should our State's heritage be diminished by the disruption from the current and proposed increased air cargo flights to and from Mather?

The Coloma Valley, Marshall Gold Discovery State Park and the American River corridor running down and into Lake Folsom is now experiencing fall and winter visits of the Federally protected Bald Eagle into its historic habitat. US Fish and Wildlife and Cal Fish and Wildlife should make comments to this aspect of the DEIR as well.

Reviewing the DEIR document, I've found no review of the fact that State Hwy. 50 functions at CALTRANS Level "F" in the area near the airport. This is the lowest

level of service measurable due to gridlock during peak and other measurable times. The additional medium and heavy truck traffic generated by the proposed expansion should be address in the DEIR.

I believe that the most logical course for Sacramento County would be to concentrate its air cargo operations at Sacramento International Airport where there is excess capacity for flights and traffic generated from the air cargo operations and not increase air cargo operations or upgrade to an ILS CAT 3 at Mather Airport.

While Mather Airport is in Sacramento County, its impacts are much farther reaching and these impacts to surrounding areas should also be taken into consideration when preparing a DEIR.

Sincerely,

Jeff Lee

As residents of El Dorado Hills, we **strongly** oppose expansion of Mather flights over our home which will negatively impact quality of life. The negative financial impact to El Dorado County will be huge, while Sacramento County will be enjoying all the financial benefits. You have the power to move flights further south similar to the accommodation given city of Sacramento at Sacramento International Airport.

Return cargo operations back to its origin, Sacramento International Airport which has the infrastructure to accommodate air cargo operations without an impact to neighboring communities. Stop the installation of the Mather Airport Category IIIb Instrument Landing System.

To whom it may concern:

I am requesting that you return cargo operations back to Sacramento International Airport because they have infrastructure to accommodate air cargo operations without an impact to neighboring communities.

In addition, I am requesting that you stop the installation of the Mather Airport Category IIIb Instrument Landing System due to the significant negative impact to the quality of life to El Dorado County and Folsom residents.

Please vote NO on Mather Airport expansion.

Thank you.

Sincerely,

Zoe Brown
