

EL DORADO COUNTY GENERAL PLAN ECONOMIC DEVELOPMENT ELEMENT

PRINCIPLES

The General Plan provides opportunities for positive economic growth such as a full range of local employment opportunities, a more diversified local economy, greater capture of tourism, and increased retail sales.

The General Plan provides an opportunity to strategically plan for El Dorado County's role in a growing regional economy.

The General Plan provides land use guidelines which create opportunity to further economic self-sufficiency and foster a sound economic base to afford quality service levels while maintaining economic competitiveness and encourage retention of El Dorado County's quality of life.

The General Plan provides land use guidelines that will permit and encourage economic activities that create employment opportunities that are commensurate with local housing costs, generate a positive sustained revenue flow into the County, maximize economic multiplier effects, and minimize reliance upon County services and expenditures.

The General Plan recognizes, promotes, facilitates, and supports activities that provide a positive sustaining economic base for the County, maximize the economic potential of the County's natural resources, reduce out-of-County retail purchase and employment travel, and provide housing and job opportunities that are accessible to all levels of our society.

INTRODUCTION

Local planning, through the inclusion of an Economic Development Element in the General Plan or preparation of an Economic Strategic Plan, can be used to strengthen community development activities, enhance economic growth, and reinforce the planning process as a positive part of economic development. An improved local business climate which recognizes sub-regional constraints and opportunities, expansion of the local tax base, and

enhanced employment opportunities are benefits of a planning effort that has an emphasis on economic development. An Economic Development Element can be directed at a wide range of economic issues. Reinforcement of the planning process through the adoption of an Economic Development Element or strategic plan can be an effective method of managing growth in order to achieve a broad range of community goals and objectives. Should the Economic Development Providers Network cease to exist, another cooperative private/public sector group may be formed as sanctioned by the Board of Supervisors to fill the role that this element contemplates for the Network.

STATE AUTHORIZATION

An economic development element is not a required element under State law. However, California Planning law states that “the general plan may include any element(s) or address any . . . subject(s) which . . . relate to the physical development of the county (Government Code Section 65303).” The general plan guidelines, prepared by the Office of Planning and Research, state that “upon adoption, an optional element becomes an integral part of the general plan. It has the same force and effect as the mandatory elements and must be consistent with the other elements of the plan.”

RELATIONSHIP TO OTHER ELEMENTS

The Economic Development Element is directly related to all other elements contained within the General Plan.
