El Dorado County—Stormwater/Flood Control Planning

El Dorado County engineering staff will do preliminary planning on the final phase of the CSA #5 Erosion Control Project, a stormwater/flood control project in Tahoma, CA.

Task 1: Assessment and Evaluation

- Hydrology and hydraulics analysis modeling and predicting water flow
- Project feasibility report to include design alternatives and a preferred project alternative

Deliverables: Hydrology and hydraulics report; feasibility report

Key Milestones: Maps identifying current conditions on the ground, including current drainage conditions, topography, hard surface coverage, utility locations, and soil infiltration capabilities; land ownership and possible land acquisition needs will be identified; existing challenges and project elements to take advantage of will be documented; a report including design alternatives and a preferred project alternative will be developed.

Justification: This is a project development activity. The CSA #5 Erosion Control Project is a multiple-benefit project that includes water quality and drainage improvements to mitigate localized flooding. As a part of a larger water quality project, El Dorado County will provide the assessment and evaluation necessary to upgrade water quality and drainage infrastructure within a designated Disadvantaged Community Tract. Inadequate drainage results in localized flooding of residential areas and increased sediment loading in urban runoff.

If the Grantee fails to cure the default within the time prescribed by the State, State may do any of the following:

- 1) Declare the funding be immediately repaid, with interest, at the California general obligation bond interest rate at the time the State notifies the Grantee of the default.
- 2) Terminate any obligation to make future payments to Grantee.
- 3) Terminate the Grant Agreement.

EXHIBIT A WORK PLAN

This Work Plan describes the work to be performed (including deliverables) by The California Rural Water Association ("Grantee") on behalf of the Lahontan IRWM Funding Area for the Proposition 1 IRWM Disadvantaged Community (DAC) Involvement Grant Program.

The associated general budget and schedule for this work are presented in Exhibits B and C, respectively. Within 30 days of the execution of the grant agreement with DWR, to assist DWR in tracking the work and reviewing and processing invoices, Grantee will submit to DWR a detailed budget and graphical schedule for each project described herein.

The Lahontan Funding Area Disadvantaged Community (DACI) Involvement work plan includes 1 project that contains 8 activities, and addresses DAC water management concerns within the Funding Area. The objective of this work plan is to increase DAC involvement in Integrated Regional Water Management (IRWM) activities and opportunities. The six IRWM regions of the Lahontan Funding Area have completed needs assessments to various degrees. Not all regions will be expressly performing needs assessments through this project, but all regions will be able to complete the needs assessment table at the back of the "DACI Request for Proposals" by the end of this grant period. Past experience, of the five IRWM Regions participating in this grant, informed the selection of activities included in this work plan designed to build capacity in DAC water systems and provide resources that allow local agencies to prepare project planning documents for projects in DAC that can increase competitiveness for future funding opportunities.

Activity 1: Grant Administration

Task 1.1: Administration

Coordinate with IRWM regions within the Lahontan Funding Area to develop draft DACI grant proposal, respond to DWR comments, and submit final grant proposal. Manage grant agreement including compliance with grant requirements, and preparation and submission of supporting grant documents.
