Section 5. Section 130.30.050 entitled “Setback Requirements and Exceptions” is amended in part to read as follows:

Sec. 130.30.050 Setback Requirements and Exceptions.

All structures and buildings (see Article 8—Glossary: "Structure" of this Title) shall be located on a lot so as to conform to the setback requirements established for the zone in which the lot is located, as set forth in Chapters 130.21 (Agricultural, Rural, and Resources Zones) through 130.26 (Meyers Area Plan [MAP] Zone) in Article 2 (Zones, Allowed Uses, and Zoning Standards) of this Title, inclusive, except as provided in this Chapter unless and until a Variance is granted in compliance with Section 130.52.070 (Variance) in Article 5 (Planning Permit Processing) of this Title or standards are modified pursuant to a Development Plan permit in compliance with 130.52.040 (Development Plan Permit) in Article 5 (Planning Permit Processing) of this Title.

- A. Measurement of Setbacks. Setbacks shall be measured from the closest of either a property line, the edge of a road easement, or the edge of a right-of-way line to the nearest point of the foundation of a structure, on a line perpendicular to the property line, road easement, or right-of-way line.
 1. Setbacks adjacent to existing private roads without defined right-of-way or road easements shall be measured from the edge of the maintained area of the road. Setbacks adjacent to County-maintained roadways shall be measured from a distance of 30 feet from the centerline of the road.
 2. Where the Board has adopted a future roadway alignment, the minimum setback shall be measured from the edge of the future right-of-way line.
 3. Expanded setbacks from major roads identified in the Design and Improvement Standards Manual (DISM)/Land Development Manual (LDM), or successor document shall be applied to protect future right of way for the planned widening of those roads. Proposed development adjacent to these roads shall be increased by the distance shown in the DISM/LDM, or successor document.
 4. Corner Lots. A corner lot with frontage on two or more streets shall have front yard (see Article 8 - Glossary: "Yards" of this Title) setback requirements, as identified in the Development Standards Tables in Article 2 (Zones, Allowed Uses, and Zoning Standards) of this Title, along each property line adjacent to a street, subject to the following exceptions:
 - a. Double Frontage Corner Lots. On a corner lot with frontage on two streets, the building permit application shall specify the primary front yard; the remaining street frontage shall be considered the secondary front yard, as shown in Figure 130.30.050.A (Example: Corner Lot Setbacks) below in this Section. The yard opposite the primary front yard shall be considered the rear yard. The primary front yard setback shall comply with the front yard setbacks of the zone; the secondary front yard setback shall comply with the secondary front setback applicable to the zone.

Figure 130.30.050.A Example: Corner Lot Setbacks

- b. Triple Frontage Corner Lots. On a corner lot with frontage on three streets, the building permit application shall specify the primary front yard. The frontage opposite the primary front yard shall be considered a rear yard for setback purposes, providing vehicular access is restricted.
- c. Rear Setback on Triangular Lot. Where a triangular lot has no rear lot line because its side lot lines converge to a point, an assumed line placed at the point, or vertex, of the angle and running perpendicular to a line bisecting the angle shall be considered the rear lot line for the purpose of measuring the required rear setback, as shown in Figure 130.30.050.B (Example: Rear Setbacks, Triangular Lots) below in this Section.

Figure 130.30.050.B Example: Rear Setbacks, Triangular Lots

- 5. Through Lots. Through lots, or double frontage non-corner lots, shall maintain front yard setbacks for the primary frontage containing the driveway encroachment, and rear yard setbacks for the opposite frontage, providing vehicular access is restricted. Where vehicular access is allowed, front yard setbacks shall apply.
- B. Exceptions to Setback Requirements. The following exceptions to the setback requirements may be allowed where the elevation of a lot measured at the required front setback line averages six feet or more for a lot less than one acre, or eight feet or more for a lot one acre or greater, above or below the elevation at the edge of road pavement adjacent to said lot and these qualifying conditions have been documented by a licensed civil engineer or surveyor. The qualifying slope must be located directly in front of the proposed structure and must influence its placement. All reductions in front yard setbacks shall be subject to cross visibility area (CVA) requirements under Subsection 130.30.070.B.4 (Fences, Walls, and Retaining Walls—Front Yards) below in this Chapter.
 - 1. Front Setback Reduction for Single-Story Structures. Where a lot meets the qualifying conditions set forth in Subsection 130.30.050.B, the required front setback for a single-story structure may be reduced by 50 percent, except:

- a. Where a lot has more than one frontage, the elevation criteria set forth under this Subsection B must be satisfied for all frontages. If all frontages of a lot do not meet this elevation criteria, a front setback reduction for slope may be approved under administrative relief subject to Chapter 130.52 (Permit Requirements, Procedures, Decisions, and Appeals) in Article 5 (Planning Permit Processing).
 - b. Any parking structure allowed by this Subsection B.1 at a reduced front setback shall provide at least 20 feet of parking area between the edge of road pavement and the structure.
2. Front Setback Reduction for Multi-Story Structures. Where a lot meets the qualifying conditions set forth in Subsections 130.30.050.B, the required front setback for a multi-story structure may be reduced under administrative relief subject to Chapter 130.52 (Permit Requirements, Procedures, Decisions, and Appeals) in Article 5 (Planning Permit Processing) except:
- a. Where a lot has more than one frontage, the elevation criteria set forth under this Subsection B must be satisfied for all frontages.
 - b. Any parking structure allowed by this Subsection B.2 at a reduced front setback shall provide at least 20 feet of parking area between the edge of road pavement and the structure.

Section 6. Section 130.30.070 entitled “Fences, Walls, and Retaining Walls” is amended in part to read as follows:

Sec. 130.30.070 Fences, Walls, and Retaining Walls.

- C. Side and Rear Yards. In all zones, fences, walls, retaining walls, or fences and walls that are erected within five feet of a retaining wall shall be allowed within required side and rear yard setbacks to a maximum cumulative height of seven feet. Fences, walls, or fences and walls that are erected within five feet of a retaining wall such that the cumulative height exceeds seven feet, but does not exceed ten feet in cumulative height, may be allowed subject to the following:
1. Where the height of the fence or fence and wall is more than seven feet above the natural or finished grade of the adjacent property, a signed and notarized statement from the adjacent property owners that the proposed fence or wall, as described or shown in an attached exhibit, will not impact their view nor will it restrict light or movement of air and, therefore, they have no objection to the construction of the fence or wall;
 2. Director review of the notarized statement(s) to determine if it adequately represents the adjacent affected property. If such determination is made by the Director, the proposed fence or wall shall be approved through the Administrative Permit process in compliance with Section 130.52.010 (Administrative Permit, Relief, or Waiver) in Article 5 (Planning Permit Processing) of this Title. The Director may require additional notarized statements from neighboring properties if, in his/her opinion, they may be impacted by the fence or wall; and
 3. Issuance of a building permit where required by the applicable Building Code (Title 110—Buildings and Construction, of the County Code of Ordinances).

Section 7. Section 130.35.030 entitled “Off-Street Parking and Loading Requirements” is amended in part to read as follows:

Sec. 130.35.030 Off-street Parking and Loading Requirements.

- A. Off-street parking shall be provided in accordance with Table 130.35.030.1 (Schedule of Off-Street Vehicle Parking Requirements) below in this Section, unless otherwise provided in this Chapter. Where a parking requirement results in a fraction of a space, the number of parking spaces required shall be rounded to the nearest whole number.
- B. Uses Not Listed. Where the parking requirement for a use is not specifically listed in the parking schedule, the parking requirement for that use shall be determined by the Director based on the most similar use or activity for which parking requirements are established.

- C. Combined Uses. In situations where a combination of uses or activities are developed on a single site, parking shall be calculated for each separate use according to the parking schedule, except as otherwise provided in standards for shared parking, or for certain accessory uses that are subject to a 50 percent reduction in parking requirements, as noted in the parking schedule.
