Program History

2008 Dedicated master Gardener volunteer, Bob Sherwood begins process of site selection and development of the master plan.

Bob built virtually all of the hardscape at the garden. Master Gardeners are privileged to complete Bob's vision and sustain his legacy.

Program History

The partnership between EDCOE, FLC & UCCE will serve as a teaching tool for the community. The garden will not only beautify a local area but would provide important educational and science-based horticultural programs to local residents.

Mission Statement

“To extend research based knowledge and information on home horticulture, pest management, and sustainable landscape practices to the residents of California and be guided by our core values and strategic initiatives.”

University of California

Agriculture and Natural Resources | Master Gardener Program

15-1107 A 5 of 23

Community Commitment

As Master Gardeners, we are committed to educating the general public on sustainable horticulture and pest management practices based on traditional, current, and evolving research.

Science Based Education

It is our goal that the Sherwood Demonstration Garden will provide the public with a hands-on, interactive experience about research-based, sustainable gardening practices specific to the west slope of El Dorado County, appropriate for all ages and cultures, and reflective of a variety of environments and gardening experiences.

Sustainability

Funding for the Sherwood Demonstration Garden has come from proceeds of annual Master Gardener plant sales, donations from the community and in-kind contributions from businesses, local and national grants, and adoption by community service clubs, such as the Cameron Park Rotary.

The site is located on land owned by El Dorado County Office of Education and the utilities are being coordinated through Folsom Lake College/El Dorado Center. Water for the Sherwood Demonstration Garden comes from a previously established well on the site.

A community Treasure

Sherwood Demonstration Garden contains 16 individual gardens on a two-acre site. We hope our gardens will inspire visitors create their own garden paradise.
