RE: SB 1306 (Blakeslee) – State Water Resources Control Board – Support

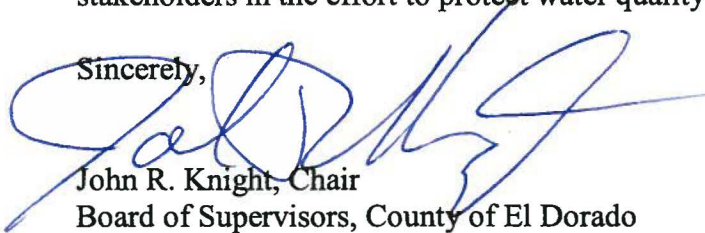

Dear Senator Blakeslee,

The County of El Dorado **supports** your Senate Bill 1306 pertaining to water quality and external scientific peer review. In requiring an external scientific peer review of the scientific basis for the adoption of general permit application requirements for storm water discharges by the State Water Resources Control Board and for the conditional waivers of waste discharge requirements for irrigated lands adopted by a regional water control board, we believe that SB 1306 will ensure that water quality guidelines are based on the best available science.

The County of El Dorado is a regulated entity as well as a stakeholder in the efforts to protect water quality. It is also our county staff that implements and enforces the requirements mandated by the State Water Resources Control Board as well as the Lahontan Regional Water Quality Control Board, and the Central Valley Regional Water Quality Control Board. New permits or waivers backed by solid science and collaboration with the stakeholders will further support the efforts to achieve the desired outcome and maximize compliance.

We support your proposal to require external scientific peer review of permit requirements for storm water and agricultural drainage and your recognition that counties are valuable stakeholders in the effort to protect water quality.

Sincerely,

John R. Knight, Chair
Board of Supervisors, County of El Dorado
