## Proof of Publication of PUBLIC NOTICE

### PUBLIC NOTICE

At their regular meeting on June 4, 2019 at 9:00 A.M. the El Dorado County Board of Supervisors will consider adoption of Ordinance 5102, pertaining to vegetation management, thereby repealing section 08.08.020-Fire Prevention of Title 8-Public Health and Safety of the County ordinance code.

Section 08.08.020 of the ordinance code is being considered for repeal as section 08.09.070 of Ordinance 5101 supersedes and improves the current language by addressing defensible fire breaks, stating all improved parcels shall comply with the following requirement:

Maintain defensible space of 100 feet from each side and from the front and rear of the structure, but not beyond the property line. The amount of fuel modification necessary shall take into account the flammability of the structure as affected by building material, building standards, location, and type of vegetation. Fuels shall be maintained in a condition so that a wildfire burning under average weather conditions would be unlikely to ignite the structure. This paragraph does not apply to single specimens of trees or other vegetation that are well-pruned and maintained so as to effectively manage fuels and not form a means of rapidly transmitting fire from other nearby vegetation to a structure or from a structure to other nearby vegetation. Ordinance 5101, Section 8.09.070 also addresses the clearing of debris from rooftops by stating all improved parcels shall comply with the following requirement:

Maintain the roof of a structure free of leaves, needles, or other vegetative materials.

A complete copy of the full text of the proposed ordinance is available for viewing in the office of the Clerk of the Board of Supervisors at 330 Fair Lane, Placerville, California.
