PAGE 8: Section 5: Optional questions to help the BSCC understand what approaches work best

Q20: Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation?

No,
If yes, how?
Not at this time, however, it is the intent of the CCP agencies to become able to evaluate and/or contract out for the evaluation of our local program/services effectiveness.

Q21: Does the county consider evaluation results when funding programs and/or services?

No,
If yes, how? Not applicable at this time.

Q22: Does the county use BSCC definitions (recidivism, average daily population, conviction, length of stay, and/or treatment program completion rates) when collecting data? To view the BSCC definitions click here.

Yes,
If yes, which terms: recidivism, average daily population, conviction, length of stay, and/or treatment program completion rates.
At this time EDC doesn't have the detailed data, but moving forward, as the data is evaluated, the BSCC definitions will be taken into account.

Q23: Of the total Public Safety Realignment funds allocated specifically to programs and/or services, what percentage is dedicated to evidence-based programming (as defined locally)?

21% - 40%

Q24: We would like to better understand your county's capacity to offer treatment, mental health, substance use disorder, behavioral health programs and/or other services. What type and level of services are now available?

Community Correction Center (CCC) - creates a one stop shop for the high risk probation offenders in the El Dorado County community. The CCC is designed to provide intensive treatment options. Below are the following list of services and the types.

MENTAL HEALTH SERVICES: Assessments, case management, short-term individual counseling (CBT programs), psychiatric evaluations, medication management, referrals to other county agencies.

ALCOHOL & DRUG SERVICES: Comprehensive substance use disorder assessment, comprehensive case management, individual counseling, substance use disorder treatment groups, moral reconnection therapy.

PUBLIC HEALTH NURSING: Infant/child, adult & family assessment and intervention, medication management education & monitoring, referral/coordination to specialty and prevention health, including dental services.

PUBLIC GUARDIAN: case management services, eligibility/benefits/application assistance to county programs, prescription medications, rehabilitation & support groups, housing & transportation, 24-hr crisis hotline, budgeting & money management, federal lifeline assistance, family & senior services, general assistance, health education & food services, income assistance (SSA/SSI/VA), reduced fee identification cards.

EDUCATION: High school diploma, GED, basic reading, writing, and vocational/enrichment.

Jail: There are hybrid versions of the services above. One of the main goals of the Jail services through Health & Human Services by actively promoting, educating, and assisting inmates with their Health Care Options while incarcerated. Inmates can access services through a direct referral process or an inmate self-directed referral process.

Q25: What challenges does your county face in meeting these programming and service needs?

One of the biggest challenges to El Dorado County is housing and transportation.

Q26: What programmatic changes and/or course corrections have you made in the implementation of Public Safety Realignment that you believe other counties would find helpful?

We have not made any significant changes to the previous plans approved by the CCP at this point. Data collection systems have been established to evaluate the effectiveness and impacts of realignment on the local justice system; however, this continues to be a work in progress.

Q27: Describe a local best practice or promising program that has displayed positive results. If data exists to support the results, please share.

The Community Corrections Center (CCC) and Jail services described in Question 24 are promising and anecdotally have shown positive results. However, a more thorough analysis is in process to ensure empirically this program and services are having an impact in reducing recidivism and future victimization.

Q28: Describe how the BSCC can assist your county in meeting its Public Safety Realignment goals through training or technical assistance.

None known at this time.
