November 14, 2022

Mr. Jeffrey Warren

Director, Environmental Services

El Dorado County

2850 Fairlane Court, Bldg C, Placerville, CA 95667

Dear Jeffrey,

El Dorado Disposal Service (EDDS) is formally requesting a rate adjustment to its hauling rates, pursuant to Section C 6, page 1-5, the "Unforeseen Circumstances" clause in the Solid Waste Rate Setting Agreement. This request is based upon your request for services received October 21, 2022, based upon CA SB 1383, reducing short-lived climate pollutants in California. In 2022, all jurisdictions are required to provide organics waste services to all residents. In order to assist El Dorado County in meeting this requirement, El Dorado Disposal would like to discuss the following curbside collection and self-haul gate rate proposals. We appreciate your co-operation and your partnership. If you have any questions or need further clarification, please feel free to contact me at 530 313-8305.

- Every other week Organic Service (Green Waste/Food Waste Mixed) @3.07 per month per home in EDCO Area A for customers with current curb-side Green Waste service.
- A public and commercial Self-haul Organics MRF Rate (Green Waste/Food Waste/Livestock Manure) of 20.88 per cubic yard.
- The over-weight charge for organics roll-off debris boxes increase of 69.73 per ton.

Sincerely,

Jeff England, Site Manager

El Dorado Disposal
