

RESOLUTION 196-2020

OF THE BOARD OF SUPERVISORS OF THE COUNTY OF EL DORADO

Adopting the El Dorado County General Plan Traffic Impact Fee (TIF) Program, previously named the Traffic Impact Mitigation (TIM) Fee Program, 2020 TIF Program Schedule

WHEREAS, the County Board of Supervisors has long recognized the need for new development to help fund the roadway, bridge and transit improvements necessary to serve that new development; and

WHEREAS, starting in 1984 and continuing until the present time, the Board of Supervisors has adopted and updated various fee resolutions to ensure that new development on the western slope pay to fund its fair share of the costs of improving the County and state roadways necessary to serve that new development; and

WHEREAS, the County prepared a General Plan entitled “2004 El Dorado County General Plan: A Plan for Managed Growth and Open Roads; A Plan for Quality Neighborhoods and Traffic Relief,” and in July of 2004 adopted that plan; and

WHEREAS, on December 6, 2016, the Board of Supervisors adopted Ordinance No. 5045 which codified the 2016 TIM Fee Program; and

WHEREAS, General Plan Policy TC-Xb requires the County to “at least every five years, prepare a TIM Fee Program specifying roadway improvements to be completed within the next 20 years to ensure compliance with all applicable level of service and other standards in this plan;” and

WHEREAS, on July 1, 2020, the State of California has determined that delay, as defined by level of service (LOS), is not an impact for purposes of the California Environmental Quality Act (CEQA) and the word “mitigation” is a CEQA term; and

WHEREAS, the County’s TIM fee program is in place to address LOS deficiencies consistent with the requirements of the County’s General Plan, and

WHEREAS, the County’s TIM Fee program will now be identified as the Traffic Impact Fee Program or TIF; and

WHEREAS, studies were conducted to analyze the impacts of contemplated future development on existing public transportation facilities in the County, and to determine the need for new public transportation facilities and improvements required by the new development; and

WHEREAS, the updated analysis identified one project that required limit adjustments, the addition of two projects that had previously been included in the program, and the removal of eight projects in the 2020 TIF Fee program; and

WHEREAS, said studies set forth the relationship between new development, the needed transportation facilities, and the estimated costs of these improvements; and

WHEREAS, after reviewing the analysis of the traffic impact fee zone alternatives, the Board has chosen to consolidate the eight traffic impact fee zones into three for purposes of allocating the costs of the public transportation facilities;

WHEREAS, after a full public hearing during which the fee structure was studied and reviewed, the Board made the following findings pursuant to Government Code Section 66001:

Government Section 66001(a)(1): Identify the purpose of the fee.

Finding for Government Code Section 66001(a)(1): The purpose of the TIF is to fund capital transportation/circulation improvements which are related directly to the incremental traffic/vehicle burden imposed upon the County's transportation/circulation system by new development in the unincorporated west slope of El Dorado County through 2040. The TIF and TIF program are an implementation measure, as required by Implementation Measure TC-B of the 2004 General Plan adopted by the County Board of Supervisors: "2004 El Dorado County General Plan: A Plan for Managed Growth and Open Road; A Plan for Quality Neighborhoods and Traffic Relief". The TIF program addresses the need to fund a road system capable of achieving the traffic level of service standards of the County's General Plan. Transportation improvements funded by the TIF include future improvements as well as improvements already installed which are subject to reimbursement agreements. Improvements included in the TIF program are necessary to accommodate new development; such improvements include, but are not limited to, new local roads, local road upgrades and widenings, signalization and intersection improvements, operational and safety improvements, Highway 50 improvements, and bridge replacement and rehabilitation. The TIF advances a legitimate County interest by enabling the County to provide infrastructure to new development and to require new development to pay its fair share.

Government Code Section 66001(a)(2): Identify the use to which the fee is to be put. If the use is financing public facilities, the facilities shall be identified. That identification may, but need not, be made by reference to a capital improvement plan as specified in Section 65403 or 66002, may be made in applicable general or specific plan requirements, or may be made in other public documents that identify the public facilities for which the fee is charged.

Finding for Government Code Section 66001(a)(2): The fee is to be used to fund transportation/circulation improvements necessary to accommodate new development in the unincorporated west slope of El Dorado County through 2040 as contemplated by the General Plan, including future improvements as well as improvements already installed which are subject to reimbursement agreements. The TIF will fund new local roads, local road upgrades and widenings, signalization and intersection improvements, operational and safety improvements, Highway 50 improvements, bridge replacement and rehabilitation, provide funding for transit improvements in accordance to the El Dorado County Transit Authority's Capital Improvement Program (CIP), and costs associated with ongoing program staff and consultant costs for annual updates, major updates, and ongoing administrated related to the TIF Program. The County's CIP, which is updated and adopted annually, identifies every project to be funded by the TIF and includes the following information for each project: detailed cash pro-formas which show all revenues by funding source and all expenditures per fiscal year; a current year work program; a future work program broken down into five year, ten year and twenty year timeframes; and additional details for each capital project, including project description, a financing plan and tentative schedule.

Government Code Section 66001(a)(3): Determine how there is a reasonable relationship between the fee's use and the type of development project on which the fee is imposed.

Finding for Government Code Section 66001(a)(3): There is a reasonable relationship between the fee's use and the type of development project on which the fee is imposed as set forth in:

- The *El Dorado County Traffic Impact Fee (TIF) Program Update Nexus & Funding Model* (Nexus Study) prepared by Urban Economics, dated December 8, 2020.
- *2020 TIF Program Update Supporting Documentation*, prepared by DKS Associates and Kimley-Horn Associates, November 2020
- The most currently adopted El Dorado County *Capital Improvement Program*.

- *The 2016 Programmatic Environmental Impact Report for the Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County*, certified on December 6, 2016.
- *The Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County Addendum to the Environmental Impact Report*, March 2018.
- *The El Dorado Countywide Housing and Employment Projections, 2018 - 2040* Final Memorandum prepared by BAE Urban Economics, dated March 17, 2020.

There is a reasonable relationship between the TIF's use and the type of development projects on which the fee is imposed because the transportation/circulation facilities funded by the TIF are needed to accommodate the incremental new traffic/vehicle burdens generated by the development of new commercial, industrial and residential uses upon which the fee is imposed. (See documents cited above.) There is a reasonable relationship between the need for the transportation/circulation facilities and the development of new commercial, industrial and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged.

Government Code Section 66001(a)(4): Determine how there is a reasonable relationship between the need for the public facility and the type of development project on which the fee is imposed.

Finding for Government Code Section 66001(a)(4): There is reasonable relationship between the need for the public facility and the type of development project on which the fee is imposed as set forth in:

- *The El Dorado County Traffic Impact Fee (TIF) Program Update Nexus & Funding Model* (Nexus Study) prepared by Urban Economics, dated December 8, 2020.
- The most currently adopted El Dorado County *Capital Improvement Program*.
- *The 2016 Programmatic Environmental Impact Report for the Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County*, certified on December 6, 2016.
- *The Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County Addendum to the Environmental Impact Report*, March 2018.
- *The El Dorado Countywide Housing and Employment Projections, 2018 - 2040* Final Memorandum prepared by BAE Urban Economics, dated March 17, 2020.

There is a reasonable relationship between the need for the public facility and the type of development projects on which the fee is imposed because the transportation/circulation facilities funded by the TIF are needed to accommodate the incremental new traffic/vehicle burdens generated by the development including those from new commercial, industrial and residential uses upon which the fee is imposed. (See documents cited above.) There is a reasonable relationship between the need for the transportation/circulation facilities and the development of projects including new commercial, industrial and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged.

The *El Dorado County Traffic Impact Fee (TIF) Program Update Nexus & Funding Model* (Nexus Study) prepared by Urban Economics, dated December 8, 2020 provides a thorough analysis of the required transportation facilities to be improved as a result of development, and provides information of the fair share analysis and fees required by Traffic Impact Fee Zone, and further broken down by development type. On November 17, 2020, the Board considered three alternative fee zone structures for purposes of allocating the costs of the public transportation facilities: the existing eight zone structure, a three zone proposal, or a two zone proposal. The Board chose the three zone proposal for implementation as part of the Major Update. Under

the three zone proposal, the rural fee zones 1, 4, 5, 6 and 7 would be consolidated into TIF Zone A. The consolidation of the rural zones into TIF Zone A would normalize the fee increases throughout the rural areas of the County. The County previously consolidated zones 2 and 3, which contain the Cameron Park and Shingle Springs area, and the proposal would formally consolidate those two zones into TIF Zone B. The proposal also would rename TIM Zone 8, which contains the El Dorado Hills area, to TIF Zone C. The TIF Program Schedule Resolution, which may be amended from time to time, provides the most current TIF rates per development type by TIF Zone.

WHEREAS, the collection process and the amount of fees for improvement of roadways and intersections identified in the El Dorado County General Plan TIF 2020 Update are set forth in Ordinance 5045 and in the TIM Fee Administration Manual.

THEREFORE, BE IT HEREBY RESOLVED,

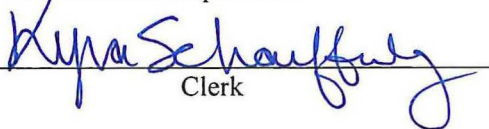

- A. The Board of Supervisors hereby adopts the amended General Plan TIF Program fees as shown in the attached Exhibit A; which shall become effective sixty (60) days following adoption of this Resolution, and the updated project costs as shown in the attached Exhibit C; and
- B. Applicants shall pay the TIF rate in effect at time of building permit issuance or at time of approval of an application for a change in the use of a building or property as defined in the TIM Fee Ordinance and TIM Fee Administrative Manual;
- C. The fees listed in the attached Exhibit A will not apply to any permit issued prior to adoption of this Resolution;
- D. All TIF Program receipts are to be expended on projects shown on Exhibit C, and may be amended from time to time in accordance with General Plan Policy TC-Xb;
- E. A map of the Three TIF Zones is provided in Exhibit B;
- F. The TIF Program Nexus study is provided in Exhibit C;

PASSED AND ADOPTED by the Board of Supervisors of the County of El Dorado at a regular meeting of said Board, held the 8th day of December 2020, by the following vote of said Board:

Attest:
Kim Dawson
Clerk of the Board of Supervisors

Ayes: Hidahl, Frentzen, Novasel

Total			\$ 81,239,000
New Development Share ¹			<u>11.47%</u>
TIF Program Share			\$ 9,318,000

¹ Development share based on federal funding for 88.53 percent of total costs. Developer share is less than could be allocated based on growth as a share of total development at the planning horizon (see Table 5).

Sources: County of El Dorado.

Table 7: Intersection and Safety Improvements

Type of Deficiency	Location	Cost per Intersection ¹	New Development Share ²	New Development Cost per Intersection	Number of Projects	Cost
Tier 1 - Existing Deficiency						
Intersections	To Be Determined	\$ 2,200,000	13.41%	\$ 295,020	2	\$ 590,000
Safety Improvements	To Be Determined	1,260,000	13.41%	168,966	10	1,690,000
Tier 2 - Future Deficiency						
Intersections	To Be Determined	2,200,000	100.00%	2,200,000	16	35,200,000
Intersections	Cameron Park Dr / Hacienda Rd ³	500,000	100.00%	500,000	1	500,000
Intersections	El Dorado Hill Blvd/Saratoga Way/Park Dr	979,000	100.00%	979,000	1	979,000
TIF Program Share						\$ 38,959,000

¹ Intersection costs based on \$350,000 for signal equipment plus \$1,850,000 for channelization and other costs. Includes intelligent transportation systems (ITS). Safety improvements based on actual costs for seven safety-focused projects completed between 2001 and 2016, adjusted for inflation.

² For existing deficiencies, TIF program share is equal to new development as a share of total development at the planning horizon (see Table 5).

³ For signal equipment only.

Sources: County of El Dorado; Table 4.

Table 8: Transit Capital Projects

Capital Project	Source	No.	Unit Cost	Total Cost	New Development Share ¹	TIF Program Share
Bus Stop Improvements	Short-range Capital Plan			\$ 13,000	13.41%	\$ 2,000
Missouri Flat Transfer Point Expansion	Short-range Capital Plan			310,000	100.00%	310,000
Cambridge Park-and-Ride Improvements	Short-range Capital Plan			200,000	13.41%	27,000
Operations and Maintenance Facility Improvements	Short-range Capital Plan			40,000	13.41%	5,000
Fleet Expansion						
Paratransit Van	Short-range Capital Plan	1	\$ 67,000	\$ 67,000		
Dial-A-Ride Vans	Long-range Capital Plan	5	42,000	210,000		
Local Route Buses	Long-range Capital Plan	2	504,000	1,008,000		
Subtotal				\$ 1,285,000	100.00%	1,285,000
Cambridge Park-and-Ride Improvements	Long-range Capital Plan			\$ 2,725,000	13.41%	365,000
County Line Transit Center	Long-range Capital Plan					
Land				\$ 1,406,000		
Construction				7,117,000		
Subtotal				\$ 8,523,000	13.41%	\$1,143,000
Total				\$ 13,096,000		\$ 3,137,000

Notes:
 Costs do not include planned transition to zero emission vehicle fleet.
 Costs exclude projects within the City of Placerville.
 Bass Lake Hills Park and Ride improvements are anticipated to be funded directly by nearby development projects.

¹ For capital projects not directly related to growth, TIF program share is equal to new development as a share of total development at the planning horizon (see Table 5).

Non-TIF Funding Estimates

Table 13: State & Federal Funding for TIF Program

Funding Source	Funding Distribution Method	Estimated Annual Funding		20-year TIF Program Funding (\$2019 \$)		
		EDCTC Total	El Dorado County Allocation	Potential	Maximum Potential Allocation for TIF Projects ¹	Maximum Potential TIF Program Funding
Federal						
Congestion Mitigation and Air Quality (CMAQ)	Competitive ² Formula	\$1,588,088	\$ 619,354	\$12,387,080	50%	\$ 6,193,540
Urban Surface Transportation Block Grant		860,274	860,274	17,205,480	80%	13,764,384
Highway Infrastructure Program (HIP)		522,678	422,322	8,446,440	80%	6,757,152
Subtotal		\$2,971,040	\$1,901,950	\$38,039,000	70%	\$26,715,076
State						
State Transportation Improvement Program (STIP)	Competitive ⁴ Formula ⁵	6,044,000	2,115,400	42,308,000	80%	33,846,400
Exchange (Rural) Surface Transportation Block Grant		831,597	548,437	10,968,740	80%	8,774,992
Subtotal		\$6,875,597	\$2,663,837	\$53,276,740	80%	\$42,621,392
Total		\$9,846,637	\$ 4,565,787	\$ 91,315,740	76%	\$ 69,336,468

Note: EDCTC is the El Dorado County Transportation Commission.

Note: Funding sources represent those likely applicable to TIF projects. Excluded sources that TIF projects would unlikely be eligible for such as funding for active transportation (bicycle and pedestrian), roadways maintenance, transit, and airport projects. Excluded funding sources that could apply to TIF projects but are too speculative or competitive to rely on for funding, such as SB 1 Local Partnership Program. Transit funding sources excluded because TIF transit projects costs represent the TIF share only.

¹ Share of El Dorado County funding allocated to the TIF program is based on estimate of funding needs for projects not included in the TIF program.

² CMAQ funding allocated through competitive process, approximately every three years. Funding estimate based on the County's historical share of CMAQ funding (39 percent) since 2009/10.

³ HIP is a new funding source for EDCTC and currently not allocated by formula or competitive process. Currently funds are allocated to the City of Placerville to complete a specific project (WPI phases 2 and 2.2). Assume funds in the future are allocated using the same formula as the Exchange STBGP.

⁴ STIP is programmed to regionally significant projects by the EDCTC and the California Transportation Commission. Funding based on the County's historical share of STIP funding since 2000.

⁵ The County receives 80.8% or the remaining balance of Rural STBGP funding after the City of Placerville receives a minimum of \$200,000

Source: El Dorado County Transportation Commission (for total estimated funding); County of El Dorado (for TIF program allocation).

¹ Fund balance allocated based on total Hwy. 50 cost shares by zone.

² Local-serving nonresidential cost allocation is based on the overall local-serving nonresidential percentage (see Table 5) applied to the initial nonresidential cost, by zone. The total local-serving cost share is then redistributed back to each zone based on each zone's residential EDUs as a share of total residential EDUs.

³ Offsets are the percentage of the initial residential or nonresidential cost per equivalent dwelling unit (EDU) that is allocated to state and federal funding, resulting in a reduction in the TIF cost per EDU. Cost per EDU for zones that have no nonresidential cost allocation (because no nonresidential development is anticipated) are set equal to the zone with the lowest nonresidential cost per EDU. Offsets for Hwy. 50 TIF are set equal to offsets for Local Roads TIF (see Table 16).

⁴ Excludes costs allocated to external trips (see Table 12).

Sources: Tables 4, 5, 12, 14, and 16.

<p>¹ "Affordable housing TIF" funding is used to fully fund the TIF on affordable housing based on a 20-year estimate of future affordable housing units. This funding does not reduce the total TIF revenue requirement because it does not reduce project costs but simply replaces TIF revenue that would be due from affordable housing projects. Therefore, the total revenue requirement shown in this table is lower than the total revenue requirement shown in in Table 17. Table 17 includes affordable housing funding as part of the revenue requirement whereas in this table affordable housing funding is deducted (as part of state and federal funding) before calculating the TIF revenue requirement.</p> <p>Source: Tables 10, 12, 14, 15, 16, and 18.</p>

¹ "EDU" (equivalent dwelling unit) equals the demand placed on the transportation network relative to one single family detached dwelling unit. EDU factors are expressed per dwelling unit for residential development, per room for hotel/motel/B&B, and per 1,000 square feet for all other nonresidential development.
