My wife and I are completely against any change of the zoning in the Camerron Park to High Density Residential.  
We belive by changing to HDR that you will destroy the quality of life for residents by increasted traffic congestion.  
With Rasmussen Park on Mira Loma Dr.we also have concerns for the safety of the childern with increasted traffic congestion

To the Planning Commission

We have been following the proposed amendment for almost 2 years. It is our sincere request that this amendment be approved as recommended by staff at this time. It is time to rectify the error made by previous admins and keep Cameron Park " a special place", it is the right thing to do for all concerned.

Respectively,  
Gerald Liggett
