

Early Promise...

In 2016, First 5 El Dorado Commission and its partners established five Community Hubs with the goal of redesigning its service delivery system to improve outcomes for children, families and communities.

Why Hubs?

El Dorado County exceeds state averages in measures of family violence, substance use and behavioral health. Accessing services is challenging for many residents. Hubs bring services to the community through trusted partners who can comprehensively serve families.

Community Hubs seek to reach families *before* crisis, increasing access to critical prevention services such as well child visits, child development screens, and support for parents as their child's first teacher.

How Do They Work?

Countywide Snapshot - Fiscal Year 2018-2019

People Served	Services Provided	Outcomes Achieved
 <p>3,351 Children ages 0-5</p>	<ul style="list-style-type: none"> ➤ 889 Literacy Activities ➤ 208 Playgroups 	<ul style="list-style-type: none"> ➤ Improved Family Functioning as demonstrated by increased protective factors amongst families served. ➤ Improved School Readiness as demonstrated by daily readiness routines amongst families served.
 <p>2,515 Parents & Caregivers</p>	<ul style="list-style-type: none"> ➤ 597 Developmental Screenings ➤ 1,622 Health Services 	

Future Potential...

In the last four years, Hubs have been successful in making progress toward their vision of building "*healthy and strong communities throughout El Dorado County.*" That said, in order to fully achieve this vision, Community Hubs will require **additional partnerships** and **resources** that extend beyond what is currently in place. Additional partners and resources are needed to fully implement the following components of the Hub model of care:

Outreach	Service Navigation	Service Expansion
Although Hubs have made progress on reaching vulnerable populations, data indicates that they are not being served in large numbers. Conducting outreach to families most in need of support will require broader networks and customized outreach approaches.	Ensuring families receive all the support needed requires an ongoing assessment of needs, services, and connections to care. Hub staff are focused on connecting families but require additional resources to effectively support the complete scope of service navigation.	Communities want to extend services for other adults and family members. For Hubs to be responsive to broader community needs, it will require partnerships that provide strategic financing for the model of care, key champions , and a sustainability plan .

Additionally, Hubs will need to expand the scope of its **vision**, **data collection** and **evaluation** to ensure that the full scope of its impact is understood.

Community Hub 1 is within Supervisorial District 1 and includes the community of El Dorado Hills.

Hub 1 - Fiscal Year 2018-2019

People Served

1,040

Children ages 0-5

716

Parents & Caregivers

Services Provided

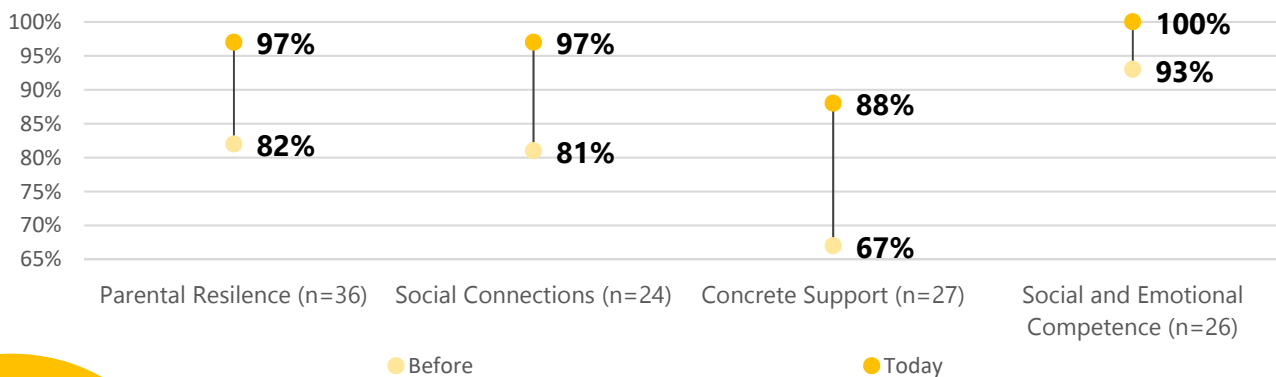

- **195** Literacy Activities
- **32** Playgroups
- **73** Developmental Screenings
- **25** Health Services

Community Hubs build strong, resilient families utilizing the research-based Strengthening Families Protective Factors framework as an approach to serving and measuring outcomes. The chart below demonstrates the amount of change for those families who experienced growth by protective factor after participating in services. In Hub 1, the greatest growths were in the areas of concrete support in times of need (21%), social connections (16%) and parental resiliency (15%).

Improved Family Functioning

Protective Factors

Agreement Before and After Receiving First 5 Services for Families Experiencing Growth

Improved School Readiness

Hubs promote school readiness by providing child development services, coaching and support for families. In Hub 1, families are supporting their children's growth and development with daily activities to include literacy (77%), numeracy (68%), learning through play (81%), physical exercise (39%), and following regular routines (69%).

Reading Routines

77% of participating families read to their child daily.

Numeracy Activities

68% of participating families practice counting or activities that involve numbers daily.

Learning through Play

81% of participating families play with their child daily.

Physical & Motor Development

39% of participating families take their child outdoors to participate in physical activities daily.

Regular Routines

69% of participating families follow a regular routine daily.
