Clerk Of The Board:

I hope you will copy this to all of the board members.

I wish to thank the board for their response on behalf of county residents, regarding the possible Yellow Frog list as an endangered species. We certainly have not had enough time to evaluate the situation and I truly expect that there is not an issue in the first place.

The EPA and all those so-called scientists have not made their case in this instance, nor in many other instances in which they have short-cutted the proper investigation process and arrived at a "junk-science" conclusion.

Too many times these lazy scientists have put animals before people and in several cases cause people to be killed by the regulations they enforce upon us. I remember specifically, the time they disallowed water to be lifted from a certain lake to extinguish a forest fire and firefighters were killed, as a result! I believe the incident happened in Oregon or Washington state.

Thank you for resisting this encroachment on our American liberties.

Respectfully,

Paul G. West, Sr.
