Re: TMA 08-0007-A Public Hearing on October 14, 2008

Dear Sirs

The Planning Committee meeting held on September 11, 2008 heard all the background and information on our appeal to continue our project and ruled in our favor. We hope that your Board will also rule that we can continue. This project is for our 20 year old grandson to have a place to live. Garrett is a hard worker and has been employed for over two years at his place of employment at a rather low rate of pay.

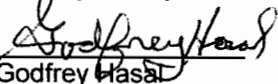

The County Council, at the September meeting, stated that the intent of the code ordinance was to keep two rentals off one parcel for fear of running down the neighborhood through neglect. Garrett is now one of the owners of the property so there will only be one rental on this parcel.

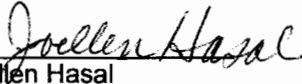

His mother wishes to leave her three children two acres each of the 6.8 acres. The County General plan forbids splitting the property at this time and needless to say, the three children are not financially in a position to handle the large expense ie: TIM fees \$17,500., water meter \$18,000. building permit, etc., etc. etc. if it could be split.

Garretts father was killed in an auto accident when Garrett was two years old, his mother had to return to work, so we have held this family very dear to us and tried to help as much as possible. Through honest endeavor but misunderstanding, his grandfather and I have started and financed the temp. mobile home for Garrett. Garrett wants to pay us back for the monies we have spent. We would not expect any payment while he attends school to acquire a more lucrative career.

The economy is faltering at this time and small and large businesses are falling by the way side. The homeless are increasing in our county and the United States. If Garrett's employer, in Diamond Springs, is forced out of business, Garrett would have security in his mobile home. He has such high hopes and plans to start his equity, plant trees, have a patio and so forth. Moving there from an upstairs apartment is his dream.

Thank you for your consideration
