

The El Dorado County Environmental Management Department/Air Quality Management District, invites **ALL** County Departments to take a drive in El Dorado County's only hybrid fleet vehicle. The vehicle is available for use by all licensed county employees who wish to use the vehicle during county business hours for county related business.

If your travels include a trip to Tahoe for county related business, the 2004 Toyota Prius will get you there and back at an average of 50 miles per gallon, all you have to do is fuel the vehicle before returning it to Air Quality Management. It's easy to drive! Not to mention, with new legislation passed, the Prius will be able to be driven in carpool lanes by a **single** occupant!

If you or an employee of yours is interested in using the Prius, please call the El Dorado County Air Quality Management District at 621-6662 for reservations. A brief demonstration on how to start the vehicle will be required for **all** employees who wish to use the vehicle.
