Subject Fw: Notice of Public Hearing

Hi CJ,

This person cannot attend the upcoming hearing on 12/9 so they've emailed me their protest. Could you please have this recorded for the public comment portion of the hearing? This is regarding Amador Disposal, Legistar #08-1532.

Thanks!

Re: Notice of Public Hearing

Dear Sirs,

A high level presentation of your staff's Business Plan includes a general rate increase an additional increases associated with an enhanced residential recycling program.

This plan includes as a customer's opinion are objectives. These potential measures of your administrative matters are being requested at a time of recession. This time a request of this nature may result in a disaster. Families today are struggling with common threads, such as staying in their homes, feeding there families, with no cost of living increases.

Recommendation for your administration is to review there program for another time in the future.

California as we all know have hardships and your proposal to increase rates will only complicate with additional hardships.

Sincerely,

Resident
