

Camino Roundabout Sculpture Project

The Camino Safety Project was an important improvement that is saving lives. That said, it left an unadorned roundabout that provides the perfect opportunity for a gateway to the Camino/Fruitridge Ag Region.

Seeing this opportunity, a small group of community members got together to create something beautiful. Following a public engagement process, local acclaimed artist, Terrie Bennett, designed a sculpture that unpeels the

artistic essence of what we love about this unique and unparalleled agricultural region.

We invite you to join us on a grassroots community effort to make this gateway sculpture a reality...

Wendy Thomas, Christa Campbell, Paul Bush, Karen Feathers, Charlie Downs, Terry LeMoncheck and Terrie Bennett

CAMINO ROUNDABOUT SCULPTURE PROJECT

The sculpture - an artful rendering of an apple - represents an exercise in community self-definition and an elegant exploration of the culture, economy and values of the Camino/Fruitridge Ag District.

A robust community survey was launched in 2023 which resulted in a clear understanding of what residents love and value about this unique and special place. Consequently, this sculpture, fabricated with corten steel, will be laser cut with images reflective of the local landscape as determined by this community process.

We invite you to be a part of something special that will be a legacy gateway for generations to come...

THIS CAPITAL CAMPAIGN WILL BE FUNDED THROUGH PRIVATE DONATIONS...
