Failure to adhere to these requirements or the inclusion of conditions, limitations or misrepresentations may be cause for rejection of the submittal. Use 8-1/2 x 11 sheets (foldouts are acceptable for charts, etc.) and font size large enough to be easily legible, but not smaller than 10 point. The original proposal and each subsequent copy must be submitted on paper, properly bound, appropriately tabbed and labeled in the following order:
- G. Price Proposal:** Provide a fee schedule or cost proposal in accordance with Exhibit B, Bid Schedule, for the services to be provided, including a separate cost for each option under Solids Handling in Exhibit A, Scope of Work. County will determine the preferred method of solids disposal following the Evaluation.

If the County awards the Project, one (1) of the following options will be awarded: Base Bid – Option A, Base Bid – Option B, a combination of Base Bid – Option A and Additive Bid – Option C, or Base Bid – Option B and Additive Bid – Option C. Bids are required for all services described in Exhibit A, Scope of Work, including all Bid Schedules A through C. Refer to Exhibit A, Scope of Work, for additional details.

Base Bid – Option A: On-site Disposal

If dewatered solids are disposed of on-site, a minimum of fifteen percent (15%) solids concentration shall be maintained. For on-site disposal, Contractor shall transfer the dewatered solids to containers for County to dispose of.

Base Bid – Option B: Off-site Disposal

If dewatered solids are transported off-site, the minimum percentage of solids concentration shall be regulated by the receiving disposal facility and compliance with such regulations shall be maintained. approved disposal facility and obtain any required permitting, testing, and other compliance documentation. Container weights shall be tracked by Contractor for site permitting purposes. Contractor shall supply all necessary equipment and containers for off-site disposal.

Services under this option shall include supplying and replacing approximately 144 Sanitaire D24 Stainless Steel Air Diffusers, inspecting the aeration system and replacing any defective parts as required, installing approximately 60 feet of six inch (6”) schedule 80 PVC pipe and stainless steel braces in approximately eight foot (8’) intervals to extend the centrifuge sludge feed line to the opposite end of the digester, and inspecting the floating decanter and replacing any defective parts as required.

For any miscellaneous parts and installation services determined necessary by County for the aeration system, floating decanter, or other applicable equipment parts, Contractor will be reimbursed on a time and materials basis plus a ten percent (10%) markup. The not-to-exceed amount for this task is ten thousand dollars (\$10,000), unless modified by a contract change order.

- XI. Award:** Award shall be recommended to the Proposer whose proposal best meets the needs of the County. The County reserves the right to reject any or all proposals, and to solicit additional proposals if deemed in the best interest of the County to do so. The decision of the County Board of Supervisors shall be final in making such determination.

If the County awards the Project, one (1) of the following options will be awarded: Base Bid – Option A, Base Bid – Option B, a combination of Base Bid – Option A and Additive Bid – Option C, or Base Bid – Option B and Additive Bid – Option C. County further reserves the right to not award Additive Bid – Option C in its entirety based on the budget for the work.

The determination of the lowest responsive, responsible Proposer will be made based on the lowest cumulative total of either: Base Bid – Option A plus Additive Bid – Option C or Base Bid – Option B plus Additive Bid – Option C.

The successful Proposer will receive written notification of the award, along with instructions for finalizing the agreement documents. Upon execution of the agreement, County will issue Contractor a written Notice to Proceed with the services.

ARTICLE XVI

Contractor to County: It is understood that the services provided under this Agreement shall be prepared in and with cooperation from County and its staff. It is further agreed that in all matters pertaining to this Agreement, Contractor shall act as Contractor only to County and shall not act, unless authorized by County as Contractor to any other individual or entity affected by this Agreement nor provide information in any manner to any party outside of this Agreement that would conflict with Contractor's responsibilities to County during the term hereof.

Such notice shall become effective upon the adoption of a final budget, which does not provide funding for this Agreement. In addition to the above, should the Board of Supervisors during the course of a given year for financial reasons reduce or order a reduction in the budget for any County department for which services were contracted to be performed, pursuant to this paragraph in the sole discretion of County, this Agreement may be deemed to be canceled in its entirety subject to payment for services performed prior to cancellation.

ARTICLE XXI

Default, Termination, and Cancellation:

- A. **Default:** Upon the occurrence of any default of the provisions of this Agreement, a party shall give written notice of said default to the party in default (notice). If such prior termination is effected, County will pay for satisfactory services rendered prior to the effective dates, as set forth in the Notice of Termination provided to Contractor, and for such other services which County may agree to in writing as necessary for contract resolution. In no event, however, shall County be obligated to pay more than the total amount of the Agreement. Upon receipt of a Notice of Termination, Contractor shall promptly discontinue all services affected, as of the effective date of termination set forth in such Notice of Termination, unless the Notice directs otherwise. In the event of termination for default, County reserves the right to take over and complete the work by contract or by any other means.

Scope of Work

Contractor shall perform all professional and technical services, work, and tasks required to accomplish the objectives set forth herein for County's Environmental Management Department, and shall provide and make available Contractor's own personnel, subcontractors, materials, vehicles, and other equipment necessary to perform the services, work, and tasks designated herein.

Objective:

Contractor shall supply all personnel, equipment, and supplies to remove and dewater all material from inside the open top five hundred thousand (500,000) gallon aerobic Digester No. 2 at the Union Mine Wastewater Treatment Plant. Services shall further include the removal of all free liquid; jetting all solids out of aeration header piping, supplying and replacing approximately 144 Sanitaire D24 316L Stainless Steel Air Diffusers, inspecting the aeration system and replacing any defective parts as required, installing approximately 60 feet of six inch (6") schedule 80 PVC pipe and stainless steel braces in approximately eight foot (8') intervals to extend the centrifuge sludge feed line to the opposite end of the digester, and inspecting the floating decanter and replacing any defective parts as required.

Digester Specifications:

The Digester No. 2 is an open top aerobic digester that holds approximately five hundred thousand (500,000) gallons of wastewater treatment facility influent. It is a mixture of septic tank, portable toilet, campground waste, and landfill leachate. The Digester No. 2 dimensions are approximately forty feet (40') by one hundred feet (100') by twenty feet (20'). There is an estimated two hundred thousand (200,000) gallons of material at the bottom of the digester containing a solids mixture of approximately fifteen percent (15%) to twenty percent (20%) with another adjustable liquid level on top containing approximately one percent (1%) to three percent (3%) solids. The digester liquid level typically can be reduced by facility staff as appropriate prior to cleaning.

The Digester No. 1 was cleaned in 2015 and six hundred one (601) tons of solids were processed at an average concentration of fifteen percent (15%) to twenty-five percent (25%). The Digester No. 2 has a similar solid content.

Removal Method:

The removal method shall be recommended by contractor and approved by County's Contract Administrator, or designee. All equipment, containers, materials, and personnel shall be supplied by Contractor.

Solids Handling:

Dewatered solids may be buried on-site or transported to an approved disposal facility.

Option A – On-site Disposal

If dewatered solids are disposed of on-site, a minimum of fifteen percent (15%) solid concentration shall be maintained. County's facility staff will collect samples and test each solids disposal container for compliance. For on-site disposal, Contractor shall transfer the dewatered solids to containers for County to dispose of.

Option B – Off-site Disposal

If dewatered solids are transported off-site, the minimum percentage of solids concentration shall be regulated by the receiving disposal facility and compliance with such regulations shall be maintained. County's facility staff will collect samples and test each solids disposal container for compliance. For off-site disposal, Contractor shall be required to locate an approved disposal facility and obtain any required permitting, testing, and other compliance documentation. Container weights shall be tracked by Contractor for site permitting purposes. Contractor shall supply all necessary equipment and containers for off-site disposal.

Supply Water:

Due to limited on-site effluent storage, on-site recycle water is the preferred choice for process water. Process water has been used on-site for over ten (10) years to mix with polymer before centrifuge injection and at the treatment plant headworks. There is a four inch (4") male cam-lock supply fitting and valve available on storage water tank #2 for Contractor's supplied pump. An alternative water source will require Contractor to obtain a fixed meter temporary water use permit from El Dorado Irrigation District. Contractor shall be responsible for all costs incurred.

Electric Supply:

On the back side of the digester building, there are three (3) spare sixty (60) amp breakers that supply four hundred sixty (460) volt three phase power and there are two (2) one hundred twenty (120) volt electrical outlets in the same building for Contractor's use.
