Dear Commissioners,

It appears I will not be able to make your meeting on 2-13-14. I am currently the Chairperson of the Diamond Springs-El Dorado Community Advisory Committee and personally have been very active in the development of the Diamond Springs and El Dorado Area Mobility and Livable Community Plan. Our Transportation Commission has done an excellent job of working with Caltrans and representatives of our local community to frame the transportation issues of our area. We now have a transportation map to guide us in the future and a reference document for future grant applications. There are a lot of "nuts and bolts" to be worked out, but we now have something to work from; a luxury we did not when our committee was chartered. My thanks to Caltrans and the El Dorado Transportation Commission for working hard to develop a "context sensitive" plan. Bob Smart
