Service Agreement Detail Document

El Dorado County- 8x5 PPR, 36 mo

For

El Dorado County

Quote Reference Number: 293900

Quote Produced on May 9, 2011

Quote Expires on Sep 6, 2011

Estimated Service Agreement Start Date: Jul 1, 2011

Hardware Maintenance Payment Frequency: Annual Prepaid

Hardware Maintenance Quote Term in Months: 36

Port Pricing Type: Switch and Terminal

Region: United States

Currency: USD

* Estimated Subsequent Invoice Amount is for informational purposes only & does not reflect 1) changes associated with utility measurements gathered at true-up, 2) subsequent component additions to already covered product categories or 3) Invoice amounts for items eligible for coverage in yearly increments. Estimated subsequent invoice amounts are calculated assuming that coverage is still available in subsequent years.

* The quoted items included in this report must be covered by a current, unexpired contract to generate a complete quote detail.

**EXT SUP refers to Extended Support which is defined in the Service Agreement Supplement, Section J or K in the respective SAS document for the maintenance coverage selected. Other products will be subject to the limitations of Extended Support effective with the end of manufacturer support for that product.

The Maintenance Services being ordered on this Order Form and the associated billing may commence, in some cases, during the Avaya Product warranty period.

Avaya will, at its discretion, perform a true up on no more than a quarterly basis to reconcile future billing on some items which have been added (activated) or removed (deactivated) during the previous period. No credits or cash payments will be issued against previously paid amounts.

Maintenance service unit price associated with CMS Administered Agents and Administered Voice Mail Boxes will remain fixed based on the number of units located at the site at time of the maintenance contract start date. This per unit charge will remain unchanged for the contracted term of maintenance support, independent of quantity changes recorded during true-ups.

Service charges for IP ports and certain Communication Manager applications (including but not limited to Wan Spare Processor, Local Spare Processor, Survivable Remote Processor & IP Agents) located at remote customer sites that are priced under the utility pricing methodology will be invoiced at customer's main/media server location. These service charges will be invoiced based on the coverage option and pricing reflected at the main site or location.
