1	4000-0082	GS2 GENERAL SERVICE KIT 2 HOOK & LINE	1	6,204.00	\$6,204.00
---	-----------	---------------------------------------	---	----------	------------

Description: The modular components (99 pieces) of the General Service 2 Hook and Line Kit (GS2) permit EOD/IED technicians to use a unique and innovative set of components individually or in combination to remotely manipulate suspect packages and ordnance using, in most cases, only a single line. The kit includes the Med-Eng "Self-Opening/Locking" Pulley, an innovative "line releasing" pulley that is patented in North America as well as single piece construction stainless steel hooks and a multi-position reel stand that can be deployed on its side to eliminate the risk of being tipped over.

The extensive components contained in this kit have been developed over the past 10 years to be robust, reliable and innovative in order to meet the rigors of field operations.

These kits have been configured with consideration for a wide cross-section of field applications and contain all items necessary for the technician to adequately address virtually any scenario.

NSN: 1385-20-003-0889
 HTS Code: 8425.19
 Country of Origin: CANADA

TOTAL: \$ 6,204.00

Med-Eng offers its new Hook and Line kits in three configurations: The two 'General Service' Hook and Line Kits, GS1 and GS2, both use a rigid Pelican case but differ in quantities of components. The Backpack Hook and Line Kit affords the user a more portable alternative to the wheeled GS2 Kit and also contains components commonly used in post-blast investigation.
